

Route 96 Road Work and Detour 4/16/18 - 8/2018

We realize that current road work projects on Route 96 may have an impact on patients traveling to Victor Health Associates, for that reason we want to provide patients with the following key information so that they can arrive at the office without incident.

- Mud Creek Bridge, which is a stretch of Route 96 in Victor between East Victor Road and McMahon Road is closed effective 4/16/18 with the project anticipated to be completed 8/2018.
- **Victor Health Associates**, located at 6532 Anthony Drive, Suite A, Victor NY 14564 is located between East Victor Road (to the east) and Brace Road (to the west).

Traveling from the West:

Due to the office being located between Brace Road and East Victor Road, you will not need to alter your route. Travelers can continue past the Local Traffic Only signs and arrive at Victor Health Associates before the road closure.

There are two Local Traffic Only Signs, one stating road closed $\frac{3}{4}$ miles ahead, and the other stating road closed $\frac{1}{2}$ mile ahead. *Per the town of Victor, those with a destination between these notices and East Victor Road are permitted to continue on Route 96, such as those traveling to Victor Health Associates.*

Traveling from the East:

Follow the signs to bypass the bridge on Route 96, which will direct you to turn right on McMahon Road to begin. Please anticipate a slightly increased travel time to reach the office.

For more detailed information, including maps and detailed detour instructions, please see the attached information:

[Resident/Commuter Brochure on Route 96 Mud Creek Bridge Replacement](#)

[Route 96 Road Closure Notice & Map](#)

Please plan travel times accordingly considering any detours as listed above. If you find you may be late to your appointment please contact the office, we will do our best to accommodate patients impacted by this detour however in some cases we may need to reschedule your appointment.
