

TYNIC 3/4 SYSTEM

Tynic 3/4 ..95% of the time this system come out 5 draws or less after it appeared 10 draws ago.

This apply to all the states.. you can work miracles with this. **This system is a 63 number system** that **we put together using our highest top frequency features to give the fastest paste system we have** and the most predictable system we created

Benefits from this system

- 1. It's 95% Chance** of a win and only a **5% risk** it won't come out In 15 draws or less
- 2. No Thinking involved. No System to learn.** Just apply the system Whenever you see last appeared 10 draws or more

9. **Make extra money** right from your phone/tablet.. 💰 📱 → 📱 💰

10. **Don't have to play everyday** or study certain patterns/ free up more time on doing other things you enjoy. 📄 ✎ 🖋️ 📚 📄

5

Midday

768

769

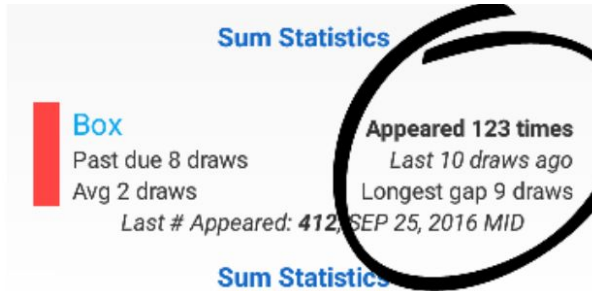

Louisiana

789

Previous Draw

885
WED, OCT 05, 2016 MID

Straight **Appeared 26 times**
Past due 10 draws Last 23 draws ago
Avg 13 draws Longest gap 29 draws
Last # Appeared: 247, SEP 12, 2016 MID

Apply this system when you see last 10 draws ago or higher

Past due

Note- **BOX PLAY**

Popular Strategy for this is the **Home Run Strategy**. Double the amount every draw to make a profit .. play no more than 5 draws

Chart Below based on .25 cents a number

11. 12. 13. 14. 15
 15.75 - 31.50 - 63 -126 - 252

Ok if you hit the first draw it's a profit

\$21.75

If you hit the 2nd draw it's a profit of

\$27.25

If you hit the 3rd draw it's a profit of
\$39.75

If you hit the 4th draw it's a profit of
\$63.75

If you hit the 5th draw it's a profit of
\$111.75

Draw 11 play .25 cents a number

Draw 12 play .50 cents a number

Draw 13 play 1.00 dollars a number

Draw 14 play 2.00 dollars a number

Draw 15 play 4.00 dollars a number

**5 Draws is the max you play in this
SYSTEM/STRATEGY**

Total to play all 5 draws is \$488.25

**So you will be risking \$488.25 to win
\$111.75 at 95% Chance**

**Now say you just wait until draw
number 5 play the 252 .. that's a
profit of \$348**

So draw number 11 is 1 draws

So draw number 12 is 2 draws

So draw number 13 is 3 draws

So draw number 14 is 4 draws

So draw number 15 is 5 draws

Remember 5 draws is the limit
Do not play more than 5 draws

Now if you're uncertain you can apply the security strategy and double after every 2 draws like this .. example min bet

\$15.75 again \$15.75 then \$31.50
again 31.50 then \$63

This approach is a lot more secure but way less profitable **and goes in the red**. examples below

Draw 11 play .25 cent a number
=\$15.75 it's a **\$21.75 Profit**

Draw 12 play .25 cent a number
=\$15.75 it's a **\$6 Profit**

Draw 13 play .50 cent a number =
\$31.50 it's a **\$12 Profit**

Draw 14 play .50 cents a number
=\$31.50 it's a loss- **-\$19.50** 🖞️

Draw 15 play \$1.00 dollar a
number =\$63 it's a loss- **-\$7.50** 🖞️

Total to play all 5 is \$157

High Rollers Alert

Max bet players this is your numbers

Draw 11 play 10x1 dollars a number =
\$630 it's a Profit of **\$870**

Draw 12 play 10x2 dollars a number
=\$1260 it's a Profit of **\$1,110**

Draw 13 play 10x4 dollars a number
=\$2520 it's a Profit of **\$1,590**

Draw 14 play 10x8 dollars a number
=\$5040 it's a Profit of **\$2,550**

Draw 15 play 10x16 dollars a number =
10,080 it's a profit of **\$4,470**

Total to play all 5 is \$19,530

You will have to max 10 dollars a number bet 2 times draw #12

You will have to max 10 dollars a number bet 4 times draw #13

You will have to max 10 dollars a number bet 8 times draw #14

You will have to max 10 dollars a number bet 16 times Draw #15

Max Bet is 10 dollars a Number

This Risk is at a 95% Chance

You can use to build or to keep you Rollin to play other strategies

WARNING

- 1. Do not create your own rules for the system 🖐**
- 2. Do not play past the original 5 draw limit 🖐**

3. Do not play unless you can cover the full system/strategy.. it will be a waste of time to only be able to play halfway. 🙅

Always use Gametracker first to back test

Always Backtest.

Keep an eye on states that's getting close to the 10 Mark .. post on our page and let our team know. Also if the apps working for you and you really like them. give us a good feedback.. it helps to keep programs around longer.

STRAIGHT WIN

Play Straight at the same time you apply the homerun strategy. Just bet the minimum 5 times...

example

- 1. \$15.75**
- 2. \$15.75**
- 3. \$15.75**
- 4. \$15.75**
- 5. \$15.75**

So Total will be \$78.75

You can apply this by itself or with the homerun strategy.

If you do it by itself Straight only. Wait until you see last appeared **10 draws ago or more from the **Box Statistics** Then start it.. You will notice that straight & box hits comes a lot once the system goes **past 10 draws****

Note - [Super 3&4 tynic](#) 3/4 system works the same on **Android and iOS**
