How You Can Help

During the coming two years we must raise $500,000 in contributions in order to achieve our objectives.

The support of people like you—citizens convinced of the need for more environmental and ecological education, and willing to back up their beliefs with a cash donation—is vital to our enterprise. Let our staff prove what it can do in extending the Center’s formal educational services, enhancing their quality and novelty, providing improved recreational facilities, and presenting a more attractive aspect to visitors.

All this can and will be done, not simply for strangers coming to the Center but for you and your family when you come to share experiences here with friends. Your part in this enterprise can be both an important contribution to the improvement of man’s relationship to nature and a source of deep personal satisfaction in years to come.

Sincerely yours,

Dr. Howard Irwin

Where Man and Nature Meet
“Whenever we try to pick out anything by itself, we find it hitched up to everything else in the Universe…”
—John Muir

And with the Right Facilities

The goal, our first priority, and our main driving force, is to continue building on the educational programs and facilities that have been developed over the years. This includes expanding the facilities to meet the needs of our students, faculty, and staff. Our focus is on creating a learning environment that is conducive to learning and growth. The Wiess Ecology Center is an example of how we are fulfilling this goal.

In the Right Place

We are situated in a beautiful setting that offers our students the opportunity to learn about the environment and its complexities. This location is not only conducive to learning but also provides a unique setting for research and discovery. Our facilities are designed to support this mission and provide our students with the tools they need to succeed.

The Wiess Ecology Center

Our center is equipped with state-of-the-art facilities that allow us to conduct research and provide educational opportunities. These facilities include laboratories, classrooms, and research spaces that are designed to support the needs of our students and faculty. We are committed to providing our students with the best possible educational experience.

With the Right People

Our success is due to the people who make this happen. Our faculty and staff are dedicated to providing our students with the best possible education. They are knowledgeable, experienced, and passionate about their work. They are committed to helping our students achieve their goals and make a difference in the world.

An Open Letter to Our Friends

We hope that you will continue to support us as we strive to achieve our goals. Your support is vital to our success, and we appreciate your continued commitment. Thank you for your support.
