

Alkaviva UltraWater Phd Faucet for Under-Counter

Models: Athena and Melody

Brushed Nickel (Stainless-Look)

Polished Chrome (Shiny)

The pHD Countertop can also be placed under the counter by connecting to the Ultra Tap Multipurpose faucet.

By using the on/off handle, (like on any other faucet), unfiltered hot and cold water is dispensed via your hot/cold lines using a standard aerator. Then, when wanted, you can transform your faucet with a smooth quarter-turn of a discreet selector lever conveniently located at the base of the unit. Flipping the lever, you have now switched from unfiltered hot/cold, to clean/healthy UltraWater from your pHD Countertop.
