

# Save Time and Money with Fab Tech Wastewater Solutions New Drive Rebuild Program!

## Drive Rebuilds for any make and model!

Fab Tech Wastewater Solutions drive rebuild program is a comprehensive rebuild of any make and model drive unit. This program is designed to save you time and money over purchasing a new drive to replace aging equipment. With the scope of the rebuild, a rebuilt drive is as close to a new drive as you can get without actually purchasing a new drive. Fab Tech offers a **5 year** warranty with all rebuilt drives where the industry standard warranty is 2 years or less. With our low prices and quick turnaround Fab Tech is the best choice for all of your drive rehabilitation needs!

## Scope of Rebuild

Our Drive rebuild program is a complete rebuild of the drive unit's wearable components. Our experienced build team starts with a complete disassembly of your drive for inspection. Upon completion of the inspection we replace any damaged components such as: Ball Bearings, Races, Bearings, Worm gear / shafting, Gaskets and seals. Aside from these internal components all hardware is replaced with full stainless steel hardware and your drive is fitted with a brand new motor and reducer to keep it running for years and years to come. The shell of the drive is then painted and reconditioned to new quality.
