

Coenzyme Q10 is an antioxidant normally produced by the body. This fat-soluble, vitamin-like substance is vital in the generation of energy for cells to function properly. Much like vitamin E, Coenzyme Q10 protects against free radicals and plays an important role in cellular health.

Biological aging, poor health and excessive exposure to environmental stressors cause production levels of Coenzyme Q10 in the body to diminish. Coenzyme Q10 applied topically to skin in the form of creams and lotions, helps restore and maintain healthy levels in the skin; improving cell function, protecting against collagen and elastin degradation and repairing the skin from the damaging effects of the sun for a smoother, more youthful complexion.

- Antioxidant
 - Improves circulation
 - Anti-aging
 - Healing
- Anti-inflammatory
 - Stimulates immune system
 - Soothing
 - Protective

ARGAN COENZYME Q10

INCI Name	Ubidecarenone
CAS Number	303-98-0
EINECS Number	206-147-9
Appearance	Yellow to orange crystalline powder
Water (KF)	Not more than 0.2%
Residue on ignition	Not more than 0.1%
Heavy metals	Less than 20ppm
Coenzyme Q10 (anhydrous basis)	98.0 ~ 101.0%
Chromatographic purity (anhydrous basis)	Not more than 1.5%

FORMULATION GUIDELINES

- For use in a variety of personal care applications including moisturizers, creams, lotions, serums, hair care, sun care and antiaging products
