

CITY OF SUGAR LAND
Engineering Department

PUBLIC NOTICE of CIP #DR1701

Drainage Improvements for Covington Woods Greywood, Sugardale and Sugarfield August 2018

The scope of the project includes:

- Two new efficient outfalls located at Ditch A-22 for Sugardale and Sugarfield.
- Improved drainage capacity with additional inlets and storm sewer.
- Full width pavement removal and replacement on Greywood Drive.
- Partial pavement removal and replacement on Sugardale and Sugarfield Drive.
- Replacement of water mains and service lines in minimal areas.
- Replacement of driveways to the street right-of-way throughout the project area.

As is typical of these projects there will be inconveniences. Lane reductions required for construction result in traffic delays. Residents will be encouraged to sign up for construction notifications on the city's web site for updates regarding lane closures and water outages while construction is ongoing. The schedule for this project is as follows:

- Construction begins August 20, 2018 thru June 2019
- Door hanger notices will be sent out to provide information prior to work in front of your home.
- Storm drain installation will begin on Greywood at Bournewood and moving east. (Late of August)

For more information, contact the City of Sugar Land Engineering Department at 281-275-2780. To sign up for email construction notification alerts go to www.sugarlandtx.gov/notifyme.
