Presidents Message

2016 has been an eventful year for the society. I would like to thank all my board members for their untiring efforts and giving their valuable time to help our society grow. We have had a huge interest in membership and the board has decided to make membership free to all to be inclusive and help disseminate knowledge to one and all. We had a hugely successful annual meeting jointly with the RCOG in 2016. We were invited by Yuva FOGSI society of India to hold a workshop in December, 2016 and participated in the congress at Bardhaman, West Bengal, India. The meeting once again was aimed at training young postgraduate trainees and I would like to thank the organising chairperson Dr Susanta Das for his efforts to organise the meeting and the warm welcome to our faculty members of the society during their visit to India.

Joint meeting ISRSFT and RCOG

*We had an exciting meeting at the RCOG in September, 2016 which was well attended both national and international participants which led to some interesting discussions and debates with leading speakers. Alison Montgomery presented the best clinical paper from **St Georges Hospital and Medical School, London**. The best research presentation was by Martin Quinn for his work in collaboration with his Chinese colleagues from **Medical University of Wenzhou, Wenzhou, CHINA**. Our next annual meeting is in November 28th and 29th, 2017 at Southampton, UK. Please do visit the website www.isrsft.org to see details of the meeting. The organising committee has taken a problem-based approach to managing contentious areas of reproductive surgery. I hope you find this interesting and we look forward to seeing you for an interesting debate and discussions at Southampton.*

Sessions at ESGE

We had our 6th successful session at ESGE congress at Brussels in October, 2016. The session was well attended and there was great interest in the interactive discussions as well attended with a very focused group of participants. We are grateful to ESGE once again for giving us an opportunity to present the issues of reproductive surgery in a separate session to all delegates attending a general endoscopy meeting. We have an exciting session with Charles Koh speaking on the role of tubal surgery in the era of ART, Antoine Watrelot speaking on fertility sparing surgery in deep endometriosis, Stephan Gordts speaking about the role of endometriosis in adolescent patients and finally Kamal Ojha speaking on the role of 3D ultrasound in fertility assessment and role of imaging during hysteroscopic surgery. Please visit our website for details about the session and if you are coming to Antalya, Turkey, in October, 2017 we will be delighted to see you at our session and join the discussion on interesting issues.

New Board Members

*Recognising the contribution for tubal reproductive surgery the ISRSFT board invited **Prof Enlan Xia, China to join our executive board**. We also like to welcome **Prof Guanjing - Regional Representative for China**. There has been growing interest and work at both tubal surgery and other aspects of reproductive surgery in China and with this in mind the ISRSFT felt it would be important to further support this trend. The faculty has regularly attended meetings and workshops in the past in China and look forward to a long collaboration. The First Launching of Chinese National Conference of Chinese Society for Fallopian Tubes and Reproductive Surgery (affiliated to Maternal and Child Health branch of National Association of Health Industry and Enterprise Management) was successfully held on September 10th-12th, 2015, in Beijing, China*

Prof Enlan Xia and Prof Guanjing with our past president Stephan Gordts

Professor Jing Guan, chief of Chinese Society for fallopian tubes and reproductive surgery, introduced the establishment of the society and discussed its vision with the present experts:

- 1. To continue recruiting members in all the provinces in China;*
- 2. To organise one national academic exchange each year;*
- 3. To investigate the situation of reproductive surgery in China and to promote the idea and relevant trainings of reproductive surgery;*
- 4. To establish a follow-up system after fallopian tubes and reproductive surgery.*

Joint meeting with ISRSFT and Academic association of Obstetrics and Gynaecologist of UKRAINE at KIEV May, 2017

This excellent meeting in the beautiful city of Kiev in Ukraine was a great experience for the ISRSFT faculty. The faculty must congratulate the local organiser's for the excellent arrangements right from the beginning with travel arrangements, lovely venue and the audiovisual arrangements they have made with such meticulous detail. We must thank especially Andrii and Lola who planned every minutest detail and also made arrangements for the faculty to visit the historic places in our short stay despite the Eurovision contest at the same weekend. We look forward to continue the collaboration with Ukraine society in the near future.

ISRSFT Faculty and the local organising committee

ISRSFT faculty with some of the delegates at the end of the meeting

Coming Events

Annual Meeting at Southampton, UK, 28th and 29th of November, 2017

Annual meeting at Southampton, UK in November please see details on the website. This exciting meeting looking at a problem based approach with a special session on fertility preservation with special reference to ovarian tissue freezing besides discussion about tubal pathology, endometriosis and fibroids. This also gives an opportunity to young clinicians and scientist to showcase there research or experience by submitting abstracts the best three abstracts will get a chance to present there findings at the meeting. So do come to the meeting and encourage your trainees submit abstracts and get involved.

3rd China Reproductive Surgery and Fallopian tube Congress from the 22nd to 24th of September, 2017. ISRSFT are delighted to support this meeting with our executive board member Professor Jing Guanjing

ESGE, Antalya, Turkey, October, 2017.

We have an interesting session reproductive surgery as mentioned above and we are looking forward to seeing those are attending this international endoscopic surgery meeting.

I on behalf of the executive board like to thank and welcome our new members and those who have been supporting this society achieving our goal to disseminate clinical knowledge, skills and encourage research in the field of reproductive surgery and fallopian tube.

With best wishes

Ertan Saridogan

President ISRSFT
