

The 6th International Symposium in Three-Dimensional Electromagnetics

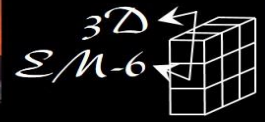

March 28-30, 2017, Berkeley, California, USA

Abstract Title	Author(s)	Abstract *.pdf File Name
Constraining lateral variations of asthenosphere electrical conductivity using satellite-detected tidal magnetic signals	Alexander Grayver and Alexey Kuvshinov	Alexander_Grayver_1
Efficient solver for stabilized formulations of the Maxwell's equations	Alexander Grayver	Alexander_Grayver_2
Recent progress in rigorous algorithms for the fast solution of 3-D EM frequency domain integral-equations	Anton Menshov, Yaniv Brick, Carlos Torres-Verdin, and Ali E. Yilmaz	Ali_Yilmaz
Modelling 3D anisotropic conductivity anomalies challenging 3D isotropic inversion	Andreas Junge	Andreas_Junge
Multidimensional-multicomponent inversion of transient electromagnetic data: Synthetic and field data applications	R. Martin and B. Tezkan	Buelent_Tezkan
Fast 3D Inversion of Borehole Resistivity Measurements using a Dimension-Adaptive Simulation Method	Á. Rodríguez-Rozas, D. Pardo, and C. Torres-Verdín	Carlos_Torres-Verdin
Three-dimensional goal-oriented finite element forward modeling for magnetotelluric using model decomposition parallel approach	Ce Qin, Xuben Wang and Ning Zhao	Ce_Qin
Hierarchical material properties in finite element modeling: An example in 3D DC resistivity modeling of infrastructure	Chester J Weiss	Chester_Weiss
3D EM modeling of steel casings using an equivalent RL circuit network	Dikun Yang and Douglas Oldenburg	Dikun_Yang
SEAM2: 3D non-seismic modeling of a complex Middle East O&G prospect	M. D. Watts, R. L. Mackie, and C. Scholl	Don_Watts
Synthesizing 3D time-domain EM data for forward modelling of uranium deposits	Drew Jones, Colin Farquharson, Seyed Masoud Ansari, and Robert Hearst	Drew_Jones
3D land CSEM inversion in noisy environment with a single transmitter: inversion approach and application for geothermal water prospecting	F. Bretaudeau, S. Penz, N. Coppo, P. Wawrzyniak, and M. Darnet	Francois_Bretaudeau
Development of flexible object oriented MATLAB codes for 3D EM modeling	Gary D. Egbert and Maxim Smirnov, Maria Cherovatova	Gary_Egbert_1
Some results from ModEM3DMT, the freely available OSU 3D MT inversion code	Gary D. Egbert, Naser Meqbel, Anna Kelbert	Gary_Egbert_2

The 6th International Symposium in Three-Dimensional Electromagnetics

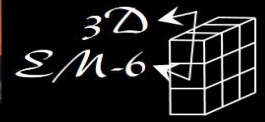

March 28-30, 2017, Berkeley, California, USA

Abstract Title	Author(s)	Abstract *.pdf File Name
On the Influences of starting/prior models in three-dimensional magnetotelluric inversion	Hao Dong and Alan G. Jones	Hao_Dong_1
Development of a scalable and flexible computation strategy for large-scale electromagnetic problems	Hao Dong, Gary Egbert and Naser Meqbel	Hao_Dong_2
Assessment of EGS water injection by using MT 3D analysis and reservoir simulator STAR	Hideaki Hase, Tatsuya Sato, Takashi Okabe, Toshihiro Uchida, Shinichi Takakura, Yasuyuki Abe and Takayuki Ohishi	Hideaki_Hase
3-D inversion of magnetotelluric impedance tensor and magnetic transfer function data using tetrahedral grids	H. Jahandari and C. G. Farquharson	Hormoz_Jahandari
A multi-scale grid strategy in time domain electromagnetic modelling	Huaifeng Sun, Kai Li, Shucai Li and Xiu Li	Huaifeng_Sun
Three-dimensional meshless magnetotelluric modelling	Jan Wittke and Bülent Tezkan	Jan_Wittke
Three-dimensional imaging of volcanic systems with magnetotellurics	Jared Peacock, Paul Bedrosian, G. J. Hill, E. Bowles-Martinez, Adam Schultz, R. Boodram, and G. Ryan	Jared_Peacock
Geophysical electromagnetic data modelling with radial basis function generated finite differences	Jianbo Long and Colin Farquharson	Jianbo_Long
A vector finite element method of 3D forward modelling for CSEM with complex-shape transmitting sources	Jianhui Li, Colin G. Farquharson, Xiangyun Hu, and Ronghua Peng	Jianhui_Li
Three-dimensional conductivity structure of the Australian Victorian lithosphere	Jingming Duan, Karol Czarnota, Tristan Kemp, and Richard Chopping	Jingming_Duan
Model order reduction of electromagnetic wave fields in open domains	J. Zimmerling, V. Druskin, M. Zaslavsky and R. Remis	Jorn_Zimmerling
3D individual and joint inversion of DC resistivity and EM data	J. Weißflog, F. Eckhofe, R.-U. Börner, M. Eiermann, O.G. Ernst, and K. Spitzer	Julia_Weissflog
Anisotropic three-dimensional inversion of marine controlled-source electromagnetic data based on a secondary-field Nédélec finite element forward operator and unstructured grids	Feiyan Wang, Jan Petter Morten, and Klaus Spitzer	Klaus_Spitzer
3D tipper response of Controlled-Source Audio-frequency Magnetotellurics	Kunpeng Wang, Handong Tan, Libin Lu and Cong Wang	Kunpeng_Wang

The 6th International Symposium in Three-Dimensional Electromagnetics

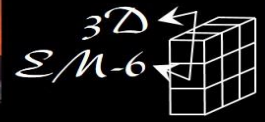

March 28-30, 2017, Berkeley, California, USA

Abstract Title	Author(s)	Abstract *.pdf File Name
Three-dimensional inversion of the frequency domain airborne CSEM data over the kimberlite complex for the conductive and susceptible heterogeneities	Kyubo Noh, Seokmin Oh, Soon Jee Seol, and Joongmoo Byun	Kyubo_Noh
Plausibility of monitoring hydrofracturing with electromagnetic array: suggestions from 3D numerical simulation	Lanbo Liu and Mark Zoback	Lanbo_Liu
Three-dimensional finite-difference magnetotelluric forward modeling in the presence of magnetic permeable heterogeneity	Libin Lu, Handong Tan and Kunpeng Wang	Libin_Lu
Fast 3D simulation of semi-airborne transient electromagnetic responses by model reduction method	Lifeng Mao and Xuben Wang	Lifeng_Mao
Modular electromagnetic simulations with applications to steel cased wells	Lindsey J. Heagy, Rowan Cockett and Douglas W. Oldenburg	Lindsey_Heagy
Multiscale and Upscaling Finite Volume Methods to Simulate Geophysical Electromagnetic Responses	L.A. Caudillo-Mata, E. Haber and C. Schwarzbach	LuzA_CaudilloMata
3-D electrical resistivity structure based on geomagnetic transfer functions exploring the features of arc magmatism	Maki Hata and Makoto Uyeshima	Maki_Hata
Implementation of the rational Krylov subspace method for marine tCSEM forward modeling and sensitivity calculation on GPU	M. Sommer, S. Hölz and M. Jegen	Malte_Sommer
3D MT and CSEM modeling with multi-resolution grid	M. Cherevatova, G. D. Egbert, M. Yu. Smirnov and M. Becken	Maria_Cherevatova
Structurally constrained 3D anisotropic inversion of marine CSEM data using a cross-gradient approach	Max A. Meju and Aslam B. A. Fatah	Max_Meju
Multi-physics inversion for reservoir modeling including transient-EM data	Michael Commer, G.M. Hoversten, S. Finsterle, and Y. Zhang	Michael_Commer
Borehole to surface electromagnetic monitoring of hydraulic fractures	G. Michael Hoversten, Christoph Schwarzbach, Eldad Haber, Patrick Belliveau, and Roman Shekhtman	Michael_Hoversten
Using well-casing antenna sources for electrical surveys	Greg Nieuwenhuis, Michael Wilt, and Dikun Yang	Michael_Wilt
extrEME-I: novel scalable multi-responses 3-D MT inverse solver	M. Kruglyakov and A. Kuvshinov	Mikhail_Kruglyakov_1

The 6th International Symposium in Three-Dimensional Electromagnetics

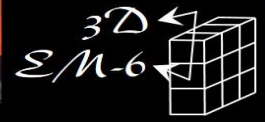

March 28-30, 2017, Berkeley, California, USA

Abstract Title	Author(s)	Abstract *.pdf File Name
Integral equation solver based on high-order polynomial basis	M. Kruglyakov and A. Kuvshinov	Mikhail_Kruglyakov_2
Sensitivity analysis of full waveform time domain data for magnetotelluric problem using fictitious wave domain method and cascade decimation decomposition	Naoto Imamura, Adam Schultz and Russell Cosgrove	Naoto_Imamura
Contraction Preconditioner in FD EM Modeling and its Parallelization	Nikolay Yavich, Mikhail Malovichko, Nikolay Khokhlov, and Michael S. Zhdanov	Nikolay_Yavich
Three-dimensional finite element forward modeling for arbitrary anisotropy magnetotelluric	Ning Zhao, XuBen Wang, Gang Yu, ZX He, Ce Qin	Ning_Zhao
Onshore 3D CSEM inversion in practice	Oliver Ritter, Kristina Tietze, Cedric Patzer and Paul Veeken	Oliver_Ritter
jInv: A modular and scalable framework for electromagnetic inverse problems	Eldad Haber and Patrick Belliveau	Patrick_Belliveau
Play fairway analysis for geothermal systems in the great basin extensional province emphasizing magnetotellurics, structural geology and isotope geochemistry	Phil Wannamaker , Virginie Maris, and Michal Kordy	Phil_Wannamaker
SEAM2: 3D inversion of synthetic MT and airborne EM from a complex Middle East O&G model	R.L. Mackie, C. Scholl, and M.D. Watts	Randall_Mackie_1
A proposal for a common MT model format	Alexander Grayver, Randall Mackie, and Marion Miensopust, and Federico Miorelli	Randall_Mackie_2
Modeling arbitrary CSEM setups with the novel FEniCS-based toolbox custEM	R. Rochlitz and T. Günther	Raphael_Rochlitz
Gauss-Newton based 3D anisotropic inversion of marine CSEM data	Ronghua Peng, Xiangyun Hu, Jianhui Li, and Jianchao Cai	Ronghua_Peng
3D EM modeling for reservoir monitoring applications	Sofia Davydycheva , Ingo Geldmacher, Tilman Hanstein, and Kurt Strack	Sofia_Davydycheva
Time-domain three-dimensional simulation of tsunami-generated electromagnetic fields using the finite element method with unstructured mesh	Takuto Minami, Hiroaki Toh, Issei Kawashima, and Hiroshi Ichihara	Takuto_Minami
Constrained 3D inversion of MT data with sparse and irregular station coverage: example from the Namibian passive margin	Ute Weckmann ,Naser Meqbel, and Oliver Ritter	Ute_Weckmann

The 6th International Symposium in Three-Dimensional Electromagnetics

March 28-30, 2017, Berkeley, California, USA

Abstract Title	Author(s)	Abstract *.pdf File Name
3D magnetotelluric imaging of basalt-covered sediments and fragmented basement of central Paraná Basin, SE Brazil	Ved P. Maurya, Sergio L. Fontes, Max A. Meju, Emanuele F. La Terra, Leonardo G. Miquelutti, David Taveira and Irineu Figueiredo	Ved_Maurya
Interpretation of deep directional resistivity measurements in high-angle and horizontal wells	V. Puzyrev, C. Torres-Verdin, and V. Calo	Vladimir_Puzyrev
The mimetic multiscale method for electromagnetics at a borehole with casing	W. Wilhelms, C. Schwarzbach and E. Haber	Wenke_Wilhelms
Near surface multiple resistivity method and interpretation study for mining uses within the context of the South African Eastern Bushveld complex	Wesley Harrison and Susan Webb	Wesley_Harrison
3D finite-volume time-domain electromagnetic modeling using unstructured grids	Xushan Lu, Colin G. Farquharson and Jianhui Li	Xushan_Lu
High resolution cross-hole electromagnetic imaging with contrast source inversion	Yongxing Li and Richard S. Smith	Yongxing_Li
Wavelet-based 3D inversion for frequency-domain AEM data	Yunhe Liu, Colin Farquharson and Changchun Yin	Yunhe_Liu
