

THE SUMMER OF SATAN

The purpose of this study is to ascertain the very unique time sequence of the 6-6-6 calendar pattern based on the Gregorian day count, that being June 6, 2016. This date has the encrypted famous Biblical number spoken of in the last book of the Bible, the Revelation of Jesus Christ. This infamous number that is to be calculated mathematically is said to be that of a man, but not just any man but the archtype of the coming Luciferian AntiChrist. Such an undertaking will be connected somehow with this 666 numerical value that will be tied to the world economy. Will this time in June 2016 see the beginning of an intensification of the Luciferian and Satanic ordinances to bring about their so called Atlantean New World Order or the start of the digital currency protocols? Will such a time see the intensification of the worldwide economic meltdown that appears to be lingering for a said time and place? As it is, this 666 numerical coefficient is tied to the worldwide economy to come as 'no one can buy or sell anything unless one has this numerical Mark.'

SUN-VENUS-EARTH CONJUNCTION
There are 5 Synodic Cycles of 8 years'

What is also very interesting about this date of June 6, 2016 is that it is accompanied by very unique astronomical factors. Primarily one aspect of this date corresponds to the celestial conjunction of Venus with the Sun. This planetary conjunction would be of no major significance except for the fact that it occurs on the backside of the Sun and in the midst of the horns of the constellation of Taurus. The mere fact that it is Venus does provide some esoterically connotations and clues perhaps. For example Venus in the opposite cosmological paradigm of its true significance is ascribed to that of Lucifer, the Light Bearer. Moreover, it is a rendition of the ancient Egyptian Isis, the Queen of Heaven.

Another very interesting aspect of this astronomical configuration of June 6, 2016 or 6-6-6 is that the Taurus constellation appears to be accented or book-ended by 2 heavenly bodies, that of the Moon and Mercury. Amazingly, the Moon will be a New Moon, meaning it is dark or 'black'.

The Moon will be in the vicinity of Orion's out-stretched arm near the center of the Silver Gate of the Heavens. On the other side of Taurus, Mercury will be brightly lit or 'white'.

Relative Size Comparison
Both are approximate in size and color

Planetary Alignment
at Start of Transit of Venus
Maximum on June 6, 2016

BACK OF SUN EXACTY 4 YEARS FROM
transit of Venus in 2012 in front of the Sun
2008 - 2012 = 4 Years (1st Obama Term)
2012 - 2016 = 4 years (2nd Obama Term)

At this precise '666' time, the planets appear to configure a 'cross' or 'X' configuration. What is very peculiar is that from Earth's perspective, Venus will be on the backside of the Sun. Amazing, it will take approximately 13 days for Venus to traverse the span of the Sun disc from Earth's reference point.

Interestingly, from the June 6, 2016 to the Summer Solstice will be also 13 days. What is rather peculiar is that exactly 4 years ago to the day, the Transit of Venus began in front of the Sun.

Still another factor to consider in this 666 cosmic alignment of the conjunction of the Sun with Venus or 'Isis', is that the delineation in-between Mercury and the Moon is in an approximate phi ratio of distance. This supposition of what angle is used is derived from the angle or inclination of the Galactic Equator no less.

Date and Time	Julian Day
