

Notice of FE / JCP&L Transmission Vegetation Management Aerial Patrols:

This serves as advanced notice of projected FE Transmission Vegetation Management Aerial patrols currently projected to start sometime between June 8, 2018 & June 15, 2018

Vegetation Aerial inspections are scheduled during the April through September time frame covering all transmission facilities system-wide annually. Patrols are intended to identify conditions that may be a threat to the safety and reliability of the transmission system.

Please be advised that Haverfield Aviation will be the helicopter company assisting in the inspections on all JCP&L Transmission Lines, projected to begin June 8, 2018 through June 15, 2018 weather permitting. The pilot will be in communication with any local airports when in their airspace. The helicopter will be flying at a speed of about 35-40 mph above or alongside the lines and may circle around for a closer inspection. As always, poor weather and emergency patrols/repairs elsewhere may cause re-scheduling and/or delays.

A second notice will be sent when dates and details are confirmed.
