

2018 BC-1MD

BY BCROASTERS.COM

The BC-1 MD is a great roaster for the advanced home roaster or a sample or small coffee shop. It can roast from 4oz. to 1lb. per roast and up to 4 roasts per hour. It was built with the same components of the big commercial roasters but due to size has only one Omron control for BT. An optional PHIDGET kit can be added to data log both ET & BT and up to 2 more components. Due to size we could not add variable drum speed control but it has the advanced and precise airflow control via the MDDS (manual damper) system. Solid heavy-duty stainless steel drum and built in profiling system for BT. Direct-Connect chaff unit for efficiency & reduced footprint.

BC-1MD	GAS TYPE
Batch Size	4oz-1lb.
