

RARE HYBRID SOLAR ECLIPSE OF 2013

COINCIDING WITH COMET ISON'S TRAJECTORY

A 'Type' of the Harvest & Rewards to Come

by Luis B. Vega

*'Ask the **LORD of the Harvest**, therefore, to send out workers into His harvest field.'* - Matthew 9:38

The purpose of this study is to illustrate the occurrence of the very rare Hybrid total solar eclipse that is scheduled to occur on November 3, 2013. What is significant about is particular Hybrid solar eclipse up to now, according to NASA's calculations, since the time of Christ only 8 H3 Hybrid types have occurred as opposed to an H1, H2 or Hm for example. More astounding is that out of the 8 total Hybrid H3 eclipses leading up the Tetrad of 2014-15, only 3 have been the even more rare (H3 n-) type since the 1st century. Impressively, the November 3, 2013 Hybrid eclipse will be the 8th H3 and 3rd (H3 n-) at the same time.

To give a scope of the rarity of this type of H3 Hybrid eclipse in general, for example, given a century of time where there will be about 250 solar eclipses altogether, only about 25 will be Hybrids. Furthermore, this type of Hybrid eclipse –according to NASA's charts, is the only one since the time of Christ that has ever preceded a Tetrad within about 160 days of each other. To reiterate, the Hybrid eclipse of Nov 3, 2013 will be the 8th H3 type in general but an even more rare type of a 3rd (H3 n-) Hybrid type leading up the Tetrad of 2014-15. And it is not just any type of Tetrad either.

There have been several Tetrads over the centuries, but what this particular about this Tetrad –as it will be for the one occurring on 2014-2015, is that all of the Total Lunar Eclipses fall on the 4 consecutive Jewish Holy Feasts of Passover and Sukkot. A Tetrad is a series of 4 consecutive total lunar eclipses. This study, with accompanied chart, will seek to also show that the Hybrid eclipse has some interesting correlations and associations with the Comet ISON. Comet ISON is said to be the brightest comet ever to be recorded and will start to be visible with the naked-eye, coincidentally on the very same day of the Hybrid eclipse. From that point on, ISON will be in the night skies with an ever increasing tail until the beginnings speed away from our inner Solar System starting in January 2014.

A timeline of the same name will graph the Jewish Holy Feast or more accurately 'the LORD's Appointed Times' to show a correlation to specific dates related to both the Hybrid eclipse and Comet ISON's trajectory. The timeline presented in the illustration will commence with the Fall Feasts of YHVH in 2014 and end with the Spring Feasts of 2014. It is this particular Spring Jewish Feast season that will coincide with the 1st Total Blood Moon of the Tetrad of 2014-15; specifically on April 15, 2014. Interestingly, as far as the timeline of dates is concerned, Comet ISON has a direct association to the Jewish Feasts of Chanukah that starts on November 27, 2013. This date of November 27th will also correspond to when Comet ISON starts to reach perihelion to the Sun, or the closest approach before being sling-shot out of our Solar System.

Unparalleled Frequency

To reiterate, the last total solar eclipse of 2013 will be taking place on November 3, 2013. It is referred to as a Hybrid eclipse because the eclipse event will have both Total and Annular properties. The Hybrid eclipse of November 3, 2013 is in a class all unto itself. It is the rarest of the rare 'Hybrid' eclipses known to mankind. According to NASA's calculations, the next one of this type, H3 is not scheduled to occur until the year 2172 and 2853. The following is the list of the only 7 Hybrid eclipse category H3 that have occurred since Christ. Out of the total 7 Hybrids, only 3 specific ones have been the (H3 n-) type. The Nov 3, 2013 will thus be the '7th' and the '3rd' at the same time.

To reiterate, a Hybrid eclipse is a unique type of 'central eclipse' where parts of the path of the eclipse are Annular while other parts are Total. This duality happens when the vertex of the Moon's Umbral shadow passes Earth's surface at various points but falls short upon the surface of the planet while it does not along other portions of the shadow's path. This is due, in part, to the curvature of Earth's surface. What is incredible in comparison to 'regular' Hybrid Solar Eclipses is that this type of Hybrid eclipse H3 has only occurred a few times since Christ. According to NASA's calculations, there have only been 3 (H3 n-) types all together.

What is more striking and different from the other Hybrid eclipses is that the November 3, 2013 Hybrid is the only one that directly precedes a Tetrad as mentioned before. This Tetrad will start on Passover April 15, 2014 -which is only 163 days out from November 03, 2013. Coincidentally ISON will be able to be seen with the naked-eye on this same day, the day of the eclipse. Comet ISON will start to leave the Solar System around the beginning of January, 2014. The last time a regular Hybrid Eclipse (H3) occurred was in 2005 where this type of Moon shadow dual-convergence occurred during the same eclipse. Another interesting number count occurs from when this 2005 Hybrid happened to the Nov 3rd one. Specifically the day count is as follows; Friday, April 8, 2005 to November 3, 2013 = 3131 days.

Prophetic Harbingers?

Perhaps this combination of the very rare Hybrid solar eclipse and Comet ISON are some sort of celestial time-markers of impending doom or gloom or hope and glory; perhaps both at the same time. Many in the End-Times community are believing that such 'signs' in the months leading up to the Tetrad of 2014-2015 may appear to be the 'harbingers' to a coming time of judgment upon the world and Israel, if not then, perhaps in the immediate time following. It will only be about 3 months after comet ISON will no longer will be able to be seen by the naked-eye, that the Tetrad of 2014-2015 total lunar eclipses will commence or 'Blood Moons' are they are also referred to.

Many End-Time Biblical scholars and Jewish theologians assert that comets are a terrible 'omen' for Israel. What is peculiar about the day of the Hybrid eclipse occurs is that the Planet Mars will be in the backdrop of comet ISON that will be able to be seen with the naked-eye for the first time. This will be possible if one is looking at the ISON from the hemisphere facing it in -which Israel is geographically at the midpoint. Of course this assertion is depending on the position and rotation of the Earth at that actual time for the scenario illustrated in the charts accompanying this study to be accurate. In relative comparison to other solar eclipses, the duration of the Hybrid eclipse is projected to be a 'brief' one. For this reason, this scenario of Israel, in particular, but that of its hemisphere i.e., Middle East to see ISON for the first time with the naked-eye against the backdrop of Mars is speculative to some degree.

But if there is some credence to such celestial imagery that may be prophetic in nature, then what that hemisphere can expect is war on a major scale against Israel. Because comets in Jewish Rabbinical teachings always signals a bad omen of war for Israel and Mars is the 'god of war', this line-up could perhaps be a heavenly 'wake-up' call to an impending war in Israel, or as in a possible 'strife and/or turmoil. Perhaps such an occurrence as this could be a 'trigger' or cause for a divergence from the civil war in Syria, the strife in Egypt or Turkey to focus such satanic hate, murder and rage onto Israel. If there is any one issue that will unite the Arabs and Muslims together after a common cause is war with Israel. Perhaps this very convergence of celestial events is signaling Israel's anticipated and prophetic 'travail' as in the pains of a delivering woman.

Indeed, this 'picture' of the line-up and timing of the 8th Hybrid eclipse with ISON crossing the Earth's plain with Mars in the background could be signaling the coming of the Time of Jacob's Troubles. This time may indeed soon come to pass for Israel and the whole world in general. Perhaps an ensuing conflict during the coming Tetrad dealing with the nations against Israel will occur as they did in 1948 and 1967. This pattern, many have suggested, could have incredible and profound prophetic implication as to the timing of the Tetrad that is to begin on April 15, 2014 during Passover. Still other speculate that these 2 celestial markers or 'Witnesses' of comet ISON in conjunction with the Hybrid eclipse will somehow signal an event that will trigger the start of perhaps the construction of the 3 Temple or soon thereafter.

This is assuming that there will be a direct association to a certain prophetic event that is to occur during the 1st Total Blood Moon of the Tetrad in the Spring of 2014. On an aside note, it was another comet, Halley's that appeared in AD 66. Many assert that it was heralding the destruction of the 2nd Temple. Perhaps this comet, Halley that occurred 1948 years ago to the 1st Tetrad of April 15, 2014 will mirror with Comet ISON and signal the reconstruction of the 3rd Temple in like manner. Thus, could this comet ISON be the prophetic comet the will signal the rebuilding of the 3rd Temple as Halley's Comet was the signal of the destruction of the 2nd Temple?

1) *Halley's Comet in AD 66 to 2014 Tetrad = **1948** Years*

2) *2nd Temple AD 70 destroyed to 2018 Triad = **1948** Years*

Some Peculiarities of the Eclipse with ISON

To reiterate, during the rare Hybrid eclipse of November 3, 2013 Comet ISON will be crossing Earth's orbital plain. At this time, the part of the Earth that will be facing comet ISON will be the Middle East, in part. The comet will be visible with the naked-eye for the first time, at that time. What is anticipated to be spectacular is that throughout the hemisphere during the Eclipse in the darkened sky, planet Mars will be positioned, in line in ISON's background.

Is it mere coincidence that ISON crosses Earth's orbital plain during the Hybrid eclipse on November 3, 2013? Is it also coincidence that at that same time frame, it will mark the first time that the comet will be able to be seen with the naked-eye from Earth? The part of the Earth that will be facing the comet as the eclipse occurs will be the Middle East and European latitudes. Since Israel is in the 'middle' of the hemisphere geographically, many End Time scholars are speculating that, the LORD perhaps will be showing Israel a 'double witness' of sorts. Listed below are the Jewish 'Feast' days or LORD's Appointed Times in 2014.

HOLIDAY	HEBREW YEAR 5774	DESCRIPTION
<i>Purim</i>	<i>Mar 16, 2014</i>	<i>Day of joy and turning tables on enemies</i>
<i>Pesach</i>	<i>Apr 15-16, 2014</i> <i>Apr 17-20, 2014</i> <i>Apr 21-22, 2014</i>	<i>Passover, the Feast of Unleavened Bread</i>
<i>Shavuot</i>	<i>Jun 4-5, 2014</i>	<i>Festival of Weeks, giving of the Torah at Mount Sinai</i>
<i>Tish'a B'Av</i>	<i>Aug 5, 2014</i>	<i>The Ninth of Av, fast -destruction of the two Temples</i>

Some Observations

From a top view of the Solar System the planets will show their relative positions during the Rare Hybrid Solar Eclipse of November 3, 2013. Comet ISON will be coming blow the Solar System as it reaches perihelion on November 27, 2013. This date is also the start of Hanukkah. Comet ISON will then swing around the Sun -if it is not disintegrated and travel above the Solar System Plain as it exits out. ISON will again be in conjunction with to the Earth's orbital plain around January 17, 2014 as it starts to exit out or the Inner Solar System Planets. The month of January 2014 will also be the limit in which the comet will able to be seen with the naked-eye.

A Type of the Rapture Harvest?

This study will also seek to illustrate comet ISON's anticipated path against the constellations as it leaves the solar system. ISON will traverse the constellations of Bootes or the Shepherd-Reaper and Ophiuchus on its way out of our Solar System. ISON will enter the constellation Bootes around December 2013. Perhaps this comet is to have a possible prophetic correlation to a Rapture 'harvest' picture on its way out. Again, this is only a study in the event's typology and is purely speculative. Nonetheless, this study will focus on one constellation in particular, that of Bootes.

Biblically speaking, this could possibly be a 'type' or picture of the 'Shepherd' exiting out with 'sheep' as he swings his 'sickle' to harvest the souls of His Bride to Glory to close out the Church Age. Could this allude to the Rapture at such a point in time? The Bible does declare that Jesus Christ will one day will 'harvest' the souls of all mankind as there are several types of prophetic harvest in the Bible. From the research and work of E.W. Bullinger. This following excerpt is taken and quoted directly comprising the Biblical and prophetic interpretation of the constellation Bootes.

Bootes - the Coming One

'He is pictured as a man walking rapidly, with a spear in his right hand and a sickle in his left hand. The Greeks called him Bo-o-tes, which is from the Hebrew root Bo as to come, as in The Coming. It is referred to in Psalm 96:13. It is probable that his ancient name was Arcturus as referred to in Job 9:9. The name of the brightest star, Arcturus. The following are the specific Stars.

- 1) **Star a** in the left knee, Arcturus means He cometh.
- 2) **Star m** in the spear-head is Al Katurops, which means the branch, treading under foot.
- 3) **Star e** just below the waist on his right side is called Mirac, or Mizar, or Izar. Mirac means the coming forth as an arrow; Mizar, or Izar, means the preserver, guarding.
- 4) **Star h** is called Muphride, i.e. one who separates as in a Harvest.
- 5) **Star b** in the head is named Nekkar, i.e. the Pierced One –Messiah (Zech 12:10), which tells us that this coming Judge is the One who was pierced. Another Hebrew name is Merga, who bruises'.

Prophetic Biblical Interpretation

'The meaning of the Stars brings us back again to Genesis 3:15, and closes up this first chapter of the First Book (VIRGO). It shows us the Person of the Promised Seed, Jesus Christ from the beginning to the end, from the first promise of the birth of the Child in Bethlehem, to the final coming of the great Judge and Harvester to reap the harvest of the Earth. Bootes is the conclusion of the first chapter of this First Book. Here we see the Woman whose Seed is to bruise the serpent's head, the Virgin-Born, the Branch of Jehovah, perfect Man and perfect GOD Immanuel, "GOD with us," yet despised and rejected of men, and yielding up His life that others may have life for evermore. But we see Him coming afterwards in triumphant power to judge the earth.' This was the vision which was afterwards shown to John (Rev 14:15,16), when he says,

"I looked; and behold a white cloud, and upon the cloud one sat like unto the Son of Man, having on His head a golden crown, and in His hand a sharp sickle. And another angel came out of the temple, crying with a loud voice to Him that sat on the cloud, Thrust in thy sickle and reap; for the time is come for Thee to reap; for the harvest of the earth is ripe. And He that sat on the cloud thrust in His sickle on the earth; and the Earth was reaped."

The Sickle

Comet ISON will speed-up, as it swings around the Sun during its perihelion on November 28, 2013. As it has been already noted, this very date will coincide also with the start of Hanukah. As the comet heads toward the Celestial Center where the 'Golden Gate; or Gate of GOD is at, it will then loop around the Sun towards the constellation Ophiuchus after its perihelion. Soon thereafter, the comet appears to go through Serpens as it 'strikes' the head of the Snake, starting around December of 2013. This echoes the Promise of Genesis 3:15...to 'bruise the Head of Satan/Lucifer'.

From a purely speculative but Biblical perspective, Comet ISON could be a very significant and prophetic 'harbinger' or sign on many levels –as portrayed going through the constellation Bootes. It could perhaps be a 'sign' for the World, the Church and Israel during and probably soon thereafter the comet leaves the Solar System. In terms of the Body of Christ, many believe that the Church Age is about to conclude in these 'Last Days'. The Church of Christ, metaphorically, could be about to be 'harvested' as the path of ISON accents the 'Celestial Sickle' that the Shepherd Bootes depicts. This 'Celestial Shepherd-Reaper' Bootes is linked to 2 animals that in ancient times were SHEEP, not canines as they are depicted in modern times today. Perhaps each is representing the 2 delineations of what comprises the Church Age; the Jewish and Gentile fusion of the one Body of Christ. Furthermore, the comet passes by the CROWN of Bootes (Corona Borealis) that awaits the Overcomers at the Bema Seat of Christ after the Rapture.

As it may appear that these remaining months leading up to the Tetrad of 2014-15 may seem like a prophetic countdown of sorts, it is no time for the Church to be caught off guard. As many individuals, marriages, churches and community of Followers of Christ are experiencing intense spiritual warfare, it is at these times when we need to stand fast in our Faith in Jesus Christ and 'be still and know that the LORD is GOD'. It appears that the Church, the world and Israel are going to be in the crosshairs of the LORD's prophetic time-clock very soon. All the heavenly signs in the Sun, Moon and Stars are screaming that the eye of the prophetic hurricane is going to be soon upon us. If either the Blessed Hope happens before this time, during or afterwards, may we cling to the Comforter, GOD the Holy Spirit for solace and peace to keep us until the *Call from on High* and 'harvest' to come.
