

PEC BASIC ORIENTATION

THE SAFETY ORIENTATION MOST WIDELY USED TO ACQUIRE SAFELANDUSA AND/OR SAFEGULF

PEC Basic Orientation is the most widely used safety orientation in the US onshore and offshore E&P Industry. Accredited by both SafeLandUSA and SafeGulf, this 8 hour safety orientation can give your employees both credentials.

In a comprehensive 1 day instructor led format, Basic Orientation meets API RP 75 & API RP T-1 requirements and provides a basic understanding of general safety information at an awareness orientation level. Upon completion of the course, all students are issued a PEC ID card with their name, company name, picture, bar code, and completed course. All students are automatically entered into PEC's Training Tracker where your company's clients and auditors can view proof of employee orientation.

With hundreds of authorized PEC trainers nationwide and a train-the-trainer available for companies with an in-house trainer, PEC makes it easy for your company to obtain Basic Orientation. Ensure your employees are using the best safety orientation for the oil and gas industry and meeting SafeLandUSA and SafeGulf requirements by using PEC Basic Orientation.
