ENERGY SAVING IDEAS

- Clean behind the fridge and freezer once a year – vacuum cooling elements.
- Clean dryer lint trap at every use.
- Clean dryer exhaust vent once a year (pipe that goes out).
- Clean or replace furnace return vent filter once a year.
- Clean swimming pool filter at least 6 times a year.
- Clean SPA filter at least 4 times a year.
- Optimize swimming pool and SPA pumps running time and duration.
- Set water fountains on timer.
- Install vacancy switches around the house to turn off lights when not in use.
- Replace burnt lights bulbs with LED.
- Install attic fans.
- Unplug chargers when not in use.
- Replace single pane windows with more energy efficient windows.
- Replace window panes with broken seals.
- Optimize attic insulation, especially around light fixtures.
- Insulate around sky lights.
- Increase/optimize crawl space ventilation.
- Insulate hot water pipes.
- Insulate water heater tank.
