

Roy H. Mann – I.S. 78
Professional Learning Plan
2017 – 2018

Through an analysis of our Quality Snapshot, NYS Accountability Report, Quality Review, Instructional Focus, The Framework for Great Schools, Danielson's Framework, Comprehensive Educational Plan, Teacher Observation Reports, Benchmark Assessments, individual student progress, and teacher surveys we have identified areas in need of improvement.

In order to provide each teacher with the training necessary to provide engaging instruction that allows for multiple points of entry based on student data, we are offering a mixture of mandated professional learning sessions focusing on high need areas, monthly "menu" option professional learning seminars allowing teachers to receive in-depth train in identified areas of need.

Teachers will be able to select a fall seminar and a spring seminar to attend. Teachers will also be given the opportunity to align curriculum, align assessments and grow together through monthly vertical planning sessions.

Teachers will utilize the information from their professional goals to select from a "menu" of professional learning seminar opportunities that best support the teacher's ability to reach his/her goals. Teachers will identify one instructional planning goal, one classroom environment goal and one instructional interaction goal based on the attached Danielson's Framework for Teaching at the start of the year and meet with their subject area supervisor to discuss their professional goals for the year. As part of the summative conference, teachers will meet with their subject area supervisor to reflect on their progress towards meeting their goals.

Over the course of the school year teachers will receive training in:

Roy H. Mann – I.S 78
Professional Learning Seminar “Menu”
2017 – 2018

Using Formative & Summative Assessment to Drive Instruction

The facilitators will outline the process used by teachers to plan assessment using the suggested lesson plan template, assess student learning and monitor student progress during instruction using the student observation checklist, make adjustments mid-lesson, provide feedback to student and support students in self and peer assessment.

Supporting ENL Students in all Subject Areas

The facilitators will outline the different proficiency levels (Beginning, Emerging, Transitioning, Expanding & Commanding), review sample ENL PLOPs, connect ENL teaching strategies to models of co-teaching strategies and provide strategies in all subject levels based on the individual students proficiency level.

Using Online Enrichment Learning to Drive Instruction

The facilitator will outline how to effectively use online enrichment learning to individualize student instruction in the classroom to meet students at their levels. Presenters will review class and individualized student data from Achieve3000 and IReady and outline the best teaching strategies based on the data obtained.

Date	Professional Learning Workshop	Presenter(s)
9/11/17	Crisis Intervention Training Child Abuse Training	Mr. Diesa Ms. Finegan & Ms. Mitsel
