

Job Opportunity: Quality Engineer 1st Shift

Impact of Position:

This individual will help develop, implement, uphold and troubleshoot Company quality and production standards/methods while assisting the Quality Assurance Manager and Quality Systems Manager with the facilitation of all company quality standards, procedures, and metrics, control plans, etc.

Duties & Responsibilities:

- Formulate and maintain Clampco Quality Objectives through communication and coordination with Sales, Engineering, Purchasing, and Production
- Develop and implement Quality Control Training Programs as required
- Conduct Internal and Supplier auditing as well as correspond/interface with outside Auditors, Customers, and Suppliers as needed
- Complete required documentation, compile, and submit PPAP packages to select Customer base
- Create and perform root-cause analysis and corrective/preventive action plans
- Help identify Continuous Improvement opportunities, and work as part of a cross-functional team to bring improvements to realization

Physical/Mental Demands:

- Light to moderate lifting, dragging, pushing, pulling parts or bins (1-50 or more pounds)
- Work can be completed seated (desk/computer) or standing/walking (floor walks/auditing)
- Occasional operation/use of company provided equipment, gage equipment (micrometers, dial calipers, Vernier, tensile machines, optical comparator, Junkers, etc.) pallet jacks, ladders, scanning guns
- Repetitive computer and parts handling – finger, hand, wrist work
- Written, oral, and/or electronic communications
 - Phone, fax, mail, email, computer, etc.
- Ability to understand/interpret data in various forms (electronic, paper, verbal) and perform statistical/critical analysis, Gage R&R, capability studies, as needed/assigned
- Ability to articulate work instructions/audit procedures/ideas, etc.
- Ability to work with vendors, customers, employees, in a professional manner
- Both individually assigned work and team oriented tasks
- Mathematical aptitude customary to industrial/quality profession:
 - Measurements fraction/decimal conversion, standard/metric, geometry, percentages

Requirements and Qualifications:

- Degree or coursework in an Engineering related field
- Previous experience with Quality Assurance – ASQ certification a plus
 - Experience with quality standards: ISO 9001, 14001; AS 9100, IATF

- Experience in industrial settings; Aerospace and Automotive Preferred
- Inspection experience/knowledge, including gage calibration, GD&T
- Experience and familiarity with PPAP process and Core Tools (e.g. Control Plan, PFMEA, Process Flow, MSA)
- Strong analytical, technical writing, project management, and communication skills
- Efficiency with Microsoft Office (Word, Excel, PowerPoint) or other software applications (MatLab, MiniTab, etc.)

Salary and benefits apply. Please submit resumes to jcvenner@clampco.com. Go to Clampdocs.com and click on the “careers” tab to view this job ad as well. This position will remain open until filled.
