

Marc Groz

CEO of CyberXplore LLC
Managing Member of RightRisk, LLC

inventor out-of-the-box entrepreneur cyber-risk management pioneer

With a background in math, psychology and technology, Marc Groz is a uniquely motivated pioneer in cyber-risk management. His firm, CyberXplore LLC, deploys gaming as a means of redirecting human behavior away from practices that threaten a firm or family's cyber-safety. (See his interview, *The Games People Play*, by clicking above on the blog *Security Briefs*.) His unique brand of risk-management is a fusion of his twenty-plus year success record in financial risk management (including tenures as Chief Risk Officer and Chief Investment Officer of hedge fund firms) and his passion for computer science. But what sets apart Marc's insights and contributions is his uncanny eye for seeing early on what makes people tick in their relationship to risk-taking and technology. Marc has addressed audiences world-wide, presented on panels across the U.S., published in *The New York Times*, *Wall Street Journal*, *PC Magazine* and appears often on TV. He has a soothing style of speaking even on rough topics. Married and a father of two college-age sons, he is a wonderful conversationalist as well as a poised platform speaker and interview guest.
