DON'T SPRAY ON ME

Vinculum facti inimicum capient. Sagitta Magica, Aer capturae.

World governments are deliberately spraying chemical or biological agents at high altitudes. These aerosols consists of ultra fine, toxic nano particulates made up of aluminum, barium and other heavy metals dangerous to the health of people when inhaled. These metal particulates are sized in the 10 nanometer range. There is no scientific oversight and these poisons are being released under the guise of 'stabilizing the atmosphere, climate control and national security'.

It is geo-engineering with a purpose to soft-kill and depopulate. It is poisoning human, animal, and plant life on Earth.
