

# Caterpillar Classroom

Toddlers are curious little explorers and bundles of energy! At Sunnyfields Learning Center, we channel that curiosity and excitement into learning. Our Toddler Classroom provides each child with experiences that are fun, active, sensory-based and meaningful. Our teachers guide the children through age-appropriate activities, helping them to improve coordination and increase verbal and problem-solving skills. Our Toddler Classroom begins each morning with circle time, this is where our teachers introduce the weather, days of the week, story time, and through the use of large picture cards- teach our little learners the words/names of everyday objects, animals, colors, etc.
