Leading exhibitions in emerging markets

With seven dedicated machine tool, precision engineering and manufacturing technology exhibitions across South East Asia, Allworld Exhibitions provides you with the most cost-effective way to meet over 70,000 of South East Asia's most important buyers of metal-working machine tool, precision engineering and manufacturing technology. With specialised sectors including 3D Printing, Metrology, Optics & Photonics, Aerospace, Electronics, Energy, Oil & Gas and Semi-conductors, our exhibitions will provide you with the best platform to establish and grow your business in South East Asia.

The ASEAN region has a population of more than 600 million people, which is larger than the European Union or North America. ASEAN has the third-largest labour force in the world, behind China and India and an extremely youthful population. The manufacturing sector is attracting a huge amount of foreign investment, making it one of the driving forces behind the strong economic growth in the ASEAN region in recent years. Now is the time to take advantage and tap into the vast potential of this flourishing market.
