*'I, Jesus, have sent My angel to testify to you these things for the Churches. I Am the Root and the Descendant of David, the **Bright Morning Star**." The Spirit and the Bride say, "Come." And let the one who hears say, "Come." And let the one who is thirsty come; let the one who wishes take the Water of Life without cost.'* –Revelation 22:16-17

The purpose of this chart is to examine the retrograde patterns of Venus for possible prophetic implications of when the Rapture season might occur and end of the Church Age is to conclude. With the conjunction of the Venus-Jupiter in Leo in the summer of 2015, many have attributed this planetary alignment to that which occurred in -2 BC. According to the reports by different news outlets, this conjunction has not occurred since that time. From the reference point of the planet Venus-Jupiter conjunction in 2015, Venus will then go into its retrograde that usually lasts about 1.6 months. What is incredible is that the planet also mirrors the time it takes for Venus to go around the Sun, 1.6 times faster as Earth makes 1 revolution around the Sun. The retrograde in Leo will end precisely 7 days from the Jewish New Year of Rosh HaShanah on September 13, 2015.

Venus goes into retrograde about once within a year and against a recurring backdrop of the Zodiac Signs or Mazzaroth. The timeline will incorporate approximately 13 years starting from 2009. The specific pattern will be marked by the Venus retrogrades of 2012 to 2020. It would appear that this 7-fold Venus retrograde pattern specifically from 2012 to 2020 construes a Menorah type of symmetry. What is unique about this timespan is that on both occasions, the Venus retrograde occurred in Taurus that constitutes a sort of cosmic bookends. What is also unique is that on average, each start of the Venus retrogrades from similar Zodiac Signs to the next same corresponding Sign are 7 years and 11 months approximately, a 7-11 code.

This 7-11 coefficient is also very significant in sacred geometry and seen even in the mathematics incorporated in the Great Pyramid of Giza. In fact the Venus retrogrades coincide with an intermittent repeating pattern of Libra-Taurus-Sagittarius. This Virgo-Taurus-Sagittarius pattern in particular mirrors itself in the timeline presented from 2009 to 2022. This pattern repeats twice in the timeline with the exception of the 2 center retrogrades in Leo and Pisces. It will be shown in the timeline that these 2 Venus retrogrades occurring in Leo and Pisces appear to constitute a fulcrum of sort or a center. What this center is designating and the timeline is centered on is the year 5776 or the Year of Light that is symmetrical with the 2009-2022 timeline and the metaphorical 7 branch Menorah as well as the Taurus retrogrades from 2012 to 2020.

The Center Point of Convergence

As noted, what is also unique about this Venus retrograde pattern starting in 2012 is that from this Taurus bookend timeframe, there are thus 3 retrogrades, 2012, 2013, 2015 that appear as though converging or centered on the year 5776. Then after the year 5776, there are 3 retrogrades that occur in 2017, 2018, 2020. All these 6 retrogrades of Venus appear to center on 2 amazing events then on 5776; the Jubilee year and specifically on the conjunction of Venus with the Sun in Taurus on June 6, 2016. On one hand the center year is the Year of Light, 5776 in the Jewish reckoning of time. This is also the Sabbatical year and the Jubilee of 49 years from the liberation of the Temple Mount in 1967. Thus this Venus retrograde timeline would suggest that 5776 is a fulcrum, a point of change, a turning point, an end and a beginning, prophetically even.

The Venus retrograde pattern occurring in Virgo-Taurus-Sagittarius is broken by the Leo and Pisces one that centers on 5776; in Leo before and in Pisces afterwards. The unique attribute about this 'center of time' and perhaps prophetic time is that the exact time center between the 2 Venus retrogrades of Taurus occurs precisely on June 6, 2016. This is taking the beginning date of the retrograde from May 15, 2012 in Taurus to the end of the retrograde of June 24, 2020 in Taurus, not including end date. This is a code of the ominous 6-6-6 numerical value of the book of Revelation. What is unique about this date is that it is when Venus 'eclipses' the Sun in a conjunction in-between the horns of Taurus. On a Biblical typology, it is reminiscent of the Shamash Servant Stem of the Menorah design used in the Temple of YHVH.

On the other hand, esoterically, this pyramid illumination of the Venus-Sun conjunction effect is paramount to being the depiction of 'illumination' or perhaps the 'Illuminated One'. This is also Biblically ascribed to the fall of Lucifer in Isaiah 14. The year 5776 is attributed to being the 'Year of Light' and has to do thus with illumination. Could it be that this is the year the Luciferian 'Light Bearer' rises as the Greek economic crisis becomes a domino infecting the Euro next and then the U.S. Dollar? Will this time see the worldwide Mark of the Beast begin to digitize currencies and be implemented as the world reserve currency once the U.S. Dollar implodes and the Chinese Yuan backed by gold is officially made one instead?

Will this time see the Beast economic system be put in place or be fully implemented 3.5 years later? What can be also inferred is that this 6-6-6 code is very prevalent in the run-up to the Year of Light 5776. Other 6-6-6 codes can be associated with the likes of the champion horse American Pharaoh and the start of the demise of the American Dollar by way of the Greek default crisis. Perhaps this need for a coming New World Order has been initiated by the Greek 'Tragedy' as Greece has defaulted on the loans it cannot pay back. The closing of the Greek banks occurred on June 27, 2015. This is month 6, $2+7 = 9$ then the year 15 with $1+5 = 6$ or 6-6-6. This is a clear synchronized countdown to the Shmitah on Elul 29/Tishri 1 on Rosh HaShanah on September 13, 2015. From June 27, 2015 to September 13, 2015 = 78 days or 11 weeks and 1 day (1-1-1).

The Numeric Symbology of Venus

The planet Jupiter is ascribed to the Messiah by Israel but what is striking in considering the Venus retrograde pattern is that out of all the planets in the Solar System, Jesus chose only one, Venus to attribute His character and depiction with as LORD of the Church. This depiction is seen in the book of Revelation at the beginning of His unveiling as He is in the position of the Servant Stem of the 7 Church Menorah that He lights up. With regards to the Menorah typology, the Venus-Sun conjunction on June 6, 2016 is perhaps a prophetic center time marker that can be likened to Center Shamash Stem. This Venus retrograde timeline can be also compared to the Hanukkah Menorah type as well as the Shamash is what is used to light the candles. In this cosmic 'snap shot', it can be attributed to a rendering of the divine pattern where the Sun, Moon and the Stars are designed to not only 'tell time' but tell of what is the time for. This 'what' is Jesus Christ perhaps related to the Rapture and the end of the Church Age. He is the Light of the World and the true type of the Servant Stem, the Shamash that is the light of men. Thus this study suggests that the Venus retrogrades are a cosmic pattern proclaiming a message and reflecting the divine pattern of Christ's glory.

The Cosmos are exclaiming End-Time prophecy that can be seen in this one facet of the Venus retrograde pattern study. What this Venus retrograde pattern suggests is that the Creator YHVH has incorporated prophecy within time as time is thus prophecy in motion. The cosmic symmetry found in the Venus retrogrades correlating to the repeating patterns of the Zodiac is striking and cannot be mere happenstance or random evolutionary chance. As to the Taurus cosmic bookends, what is also unique is that this delineation of retrogrades of Venus started precisely on the Winter Solstice in 2013. The year before, the Transit of Venus occurred on June 6, '12 (6-6-6+6) and won't occur next until 2117, 105 years later. Moreover this timeframe is in approximate phi ratio to the June 6, 2016 (6-6-6) center with the bookend retrograde in Taurus of 2020. If one were to expand the timeline to the 8 retrogrades of Venus from 2010 to 2021, the time would be exactly 11 years, 2 months and 11 days, an 11-2-11 code.

Is it any wonder why the Venus retrogrades as seen from Earth's perspective configure a pentagram Flower of Life design? The ratio is 13:8 and the function of phi is $1+\sqrt{5}/2$. What is also amazing is that this June 6, 2016 (6-6-6) date is exactly 53 years from the June 7, 1967 when the YHVH's Temple Mount was secured by the Jews since it was destroyed by the archetype, the Prince of the Romans to come, Titus in 70 AD. In considering the metaphorical Menorah type superimposed to this Venus retrograde pattern, the 2 center retrogrades occur in Leo in 2015 and in Pisces in 2017. This timeframe is exactly 1 year 10 months and 10 days or a 1-1-1 code. Also what is unique about this center in the pattern is that mathematically the Venus retrograde of 2015 in Leo is in approximate phi ratio to the end of the Year of Light on October 3, 2016 which is the 2 day celebration of Rosh HaShanah to the end of Sukkot on October 23, 2016. These dates all correlate to the Venus retrograde in Pisces in 2017. These patterns clearly demonstrate intelligent design and purpose. This study suggests that the Venus retrograde pattern portrays but a 'snap shot' of a prophetic picture of what Biblically is to occur in 5776 as foretold in the prophecies of the Bible.

It appears that the numeration of the Venus retrograde patterns are very symmetrical and prophetic. The following are some of the year to date associations based on the Venus retrograde patterns.

Prophetic Implications

As to the Venus retrograde patterns possible prophetic interpretations, the following is only a suggestive narrative. As noted, it is very obvious from the retrograde pattern that comes out that there is symmetry that centers on the year 5776. It would appear that this year is a turning point of monumental and Biblical proportions. As to its specifics, that remains to be seen but if the constellations surrounding this time and place are any indication of what is being conveyed then the following is possible. The constellations at the point of the June 6, 2016 center marker of time of the Venus retrogrades from 2012 to 2020 has the Sun in conjunction with Venus in the midst of the horns or Taurus. This event thus also acts as the Shamash. Taurus is where the Pleiades are found, the 7 Sisters that to most would agree are the metaphor for the 7 branch Menorah, the Congregation, the 7 Churches of Asia. It is from where Jesus Himself described to be in the midst as 'Venus' the Bright and Morning Star and the Son of GOD as the Sun of Righteousness.

"For behold, the day is coming, burning like a furnace; and all the arrogant and every evildoer will be chaff; and the day that is coming will set them ablaze," says the LORD of hosts, "so that it will leave them neither root nor branch." "But for you who fear My Name, the Sun of Righteousness will rise with healing in its wings; and you will go forth and skip about like calves from the stall. "You will tread down the wicked, for they will be ashes under the soles of your feet on the day which I am preparing," says the LORD of hosts. ... -Amos 4:2-4

The horns of Taurus can also be construed as a pyramid with its capstone corresponding to the Hyades or the 5 Virgins that will only be taken at the time of the 'midnight call' of the Groom from the Congregation of the Pleiades. To the left of the Sun-Venus eclipse in the horns of Taurus is Perseus with Auriga the wounded Shepherd adjacent to it. To the right of the Sun-Venus eclipse on June 6, 2016 is Orion with Gemini adjacent to it. Thus what this cosmic picture is possibly conveying in its symbology is the end of the Church Age and the Rapture or rescue to commence might very well converge also in the year 5776. As this scenario is only based on the Venus retrograde patterns and typology, it does not preclude it from occurring before or after. This study is only suggesting that such a scenario could occur during the timeframe when Jesus Christ is Venus, the Bright and Morning Star, the Light of the world, the Sun that gives light and that it corresponds to the Year of Light 5776 in some way.

What is suggested is that Jesus will be that Perseus that is coming down at the time of the Resurrection and Rapture for his 'Chained Woman', the Bride of Christ. In his hand He holds the decapitated head of the Serpent, Medusa with Algol the star that means HaSatan. Adjacent is Auriga the wounded Shepherd with the lambs on his bosom, close to His heart. As the constellations are positioned the upswing and converse is depicting the 'other side of the 'picture' in that each constellation has a dichotomy of meaning, good and evil. The good is that attributed to Christ, and the evil is that attributed to the AntiChrist; a type and archetype. The Gemini constellation subsequently portrays the union of the Bride and Groom as originally the Mazzaroth was a male and female companionship.

This is a clear indication of the coming union between Jesus Christ and His Bride. Upon the opposite side from the center time marker of these Venus retrogrades is Orion. Normally Orion according to the work of EW Bullinger is the true type of Jesus, the Hero, the Avenger that trodden underfoot the Enemy and vanquishes Satan by his bow. He is Hercules of old and true 'light bearer'. In the Luciferian twisted cosmic view, Orion is Osiris, Nimrod, Thor, etc., that is the coming AntiChrist that will rule the world with that last rendition of Lucifer's kingdom Beast as disclosed by the Prophet Daniel. It would be fitting as the coming AntiChrist, who is the rider of the 1st Horse of the Apocalypse, being white having this man with a bow but no arrow. Thus one possible prophetic interpretation of this Venus retrograde pattern centered on 5776 is that perhaps this year is when Jesus as a type of Perseus will be coming down for the Pleiades, the Bride of the 7 Church Age as the AntiChrist goes up.

What this cosmic 'snapshot' is also suggested is that the Groom only comes for the 5 Wise Virgins at the time of the Rapture of the Bride. This is depicted in the Hyades of Taurus that configure the capstone of the 'pyramid' construed by the 2 horns of Taurus as depicted from a vertical perspective. Although the 7-fold Church Age is inclusive of all, there is a need at the end to separate the chaff from the wheat, the lambs from the goats, etc. It is clear in the Bible that the Bride needs to keep, not make her white garments pure. Those in the Body of Christ in sin will be those 5 Foolish Virgins that missed the call. Such white garments were given to Christ's Bride at the expense of Jesus' red blood. She is to iron out any 'wrinkle' that has occurred while being trodden down in this fallen world as she was left to operate behind enemy lines.

Perhaps 5776 is the year that the Bride is to be rescued and the Church Age is to conclude after all at such a time as Jesus is the Good Shepard that laid down His life for the Sheep He protects in His bosom, close to His heart. During this timeframe the possible rescue or Resurrection and Rapture of the Bride is to occur as finally the Groom, Jesus and the Bride as depicted in Gemini become one to never again be separated. Perhaps as the Rapture occurs, thereafter or in an eclipsing of time, the rise of the AntiChrist, Orion will occur. This is not to say that the Rapture will occur at such a time but that according to the Venus retrograde patterns and the cosmic alignment of the Zodiac associated with the June 6, 2016 eclipsing of Venus with the Sun, the corresponding Year of Light, 5776 would appear to be spectacular in its possibility.
