

ALDONEX PERIODIC REVERSING

Our Periodic Reversing (PR) is available as Built in to the Rectifier or Separate Standalone Unit. We offer Sizing from 10 Amps to 15000 Amps. The standard PR design is Electromechanical. Some built in units will be Solid State. We have designs for Automatic operation utilizing Timers with back up Manual control. Our PR units also incorporate "No Load" Switching. Since we offer many different configurations contact the factory with your specifications for pricing.

Standard Features:

- Reversing Capacity: 10 to 15000 Amps
- Automatic or Manual Polarity Reversal for cleaning purposes
- Quality timing controls for both direct and reverse time periods
- Center Reading voltmeter to indicate output voltage
- Circuit Breaker(s)

Optional Features:

- Digital Metering
- Custom Configurations
- Switch selectable manual or automatic periodic reversing
