S>X Laws 2 (*Outer Space*)

Space exploration & colonization need rules (*laws*) which are upheld & enforced by a Space-Exploration Court (**S>X C**).
Outer Space Laws (*2*) cater for Planet Exploration & Colonizing.

If a **Province** breaks the Space-Exploration law it is punished. The people involved get prosecuted.

S-X Exploration-Law

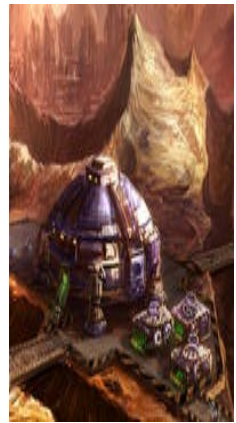

1st Exploration Claim (*1st X-C*) of a planet or moon goes to the Province that builds a permanent manned base.

1st X-C entitles to 1/7 of the planet or moon.

The 1st claimant divides the planet or moon into 7 areas, picks 1 of the areas. The 2nd claimant picks 1 of the remaining 6 areas... the 7th claimant gets the last area. Once picked, areas cannot be changed.

Changing Areas is breaking 1st X-C law Mandatory Sentence:

A Guilty Province loses the right to explore the planet or moon for 70 Years. All equipment used for this criminal activity is to be confiscated & divided equally by the honest Provinces. People involved committing this Crime get **MS/R7**

S-X Planets Moon-Law

A Planets Moon belongs to the Province that 1st builds a manned base on it. It is not shared with other Provinces!

When a moon-base becomes unmanned (*e.g. due to neglect*) any other Province may move in & claim the Moon.

S-X inner & outer Space in-compatible laws:

S-X Earth Moon-Law (*inner Space*) does not apply to other colonized Planet Moons!

S-X inner & outer Space compatible laws:

S-X Quarantine Law (*inner Space*) is applied to every colonized Planet!

S-X Satellites'-Law (*inner Space*) is applied to every colonized Planet!
