Oversize Common Carrier Delivery

All orders with any quantity of shades or blinds or any continuous valance 90" or more in width are considered oversize. Therefore, a net shipping charge per oversized unit will be assessed.

Oversized orders that require expedited shipping will be quoted and charged accordingly.

Please see General Information for additional freight and shipping charge information.

* Light Dimming fabrics provide category C, opaque light control because even when the vanes are completely closed they DO NOT completely seal off all incoming light. See vane closure diagram on page 14 for a visual reference.

A. Glare Reducing

Softly filters light and reduces glare. Images, shapes and people can be seen clearly. Provides the least amount of light and shape screening.

B. Filtering

Filters strong light. Images, shapes and people can be seen with some clarity. Provides a modest degree of light and shape screening.

C. Shading

Significantly reduces light. Images, shapes and people cannot be seen clearly. Provides a moderate to strong degree of light and shape screening.

D. Blocking

Dramatically reduces light. Images, shapes and people are not distinguishable. Provides privacy against most all direct light and shape screening (except minimal light that may seep through closed or overlapping opaque/blackout vanes).

E. Blackout

Blocks out virtually all light (except light that may enter on the sides of the shade) for maximum privacy and darkness.

STANDARD FEATURES

- Headrail Size: 3-1/4" x 3-1/16"
- Snap-in Bracket Style
- Cord Tilt & Lift
- Color-Coordinated Hardware

OPTIONS: EXTRA CHARGE

- Hardware Color Substitution Surcharge add \$30 per shading
- Cordless Lift Surcharge add \$90 per shading
- Retractable Cord Control Surcharge add \$90 per shading
- Retractable Cord Two-on-One Headrail add \$180

OPTIONS: NO CHARGE – SPECIFY ON ORDER

- Fabric-Covered Headrail
- Tilt Only Shadings 6" to 11-7/8" (standard only)
- Two-On-One Headrail – price as 2 separate shades (standard)
- Control Positions (R or L)
- Spacer Blocks
- Extension Brackets
- Hold-Down Brackets
- Back Cover for Inside or End Mounts
- Dust Cover for Outside Mounts

Note: Hardware Color Substitution is only available when the Fabric-Covered Headrail option is not selected. Please review Collection Information pages for Coordinating Hardware Color

Note: When Fabric-Covered Headrail is selected the underlying headrail color will always be white and the end caps will still be color coordinated.

STANDARD FEATURES

- Headrail Size: 3-1/4" x 3-1/16"
- Snap-in Bracket Style
- Cord Tilt & Lift
- Color-Coordinated Hardware

OPTIONS: EXTRA CHARGE

- Hardware Color Substitution Surcharge add \$30 per shading
- Cordless Lift Surcharge add \$90 per shading
- Retractable Cord Control Surcharge add \$90 per shading
- Retractable Cord Two-on-One Headrail add \$180

OPTIONS: NO CHARGE – SPECIFY ON ORDER

- Fabric-Covered Headrail
- Tilt Only Shadings 6" to 11-7/8" (standard only)
- Two-On-One Headrail – price as 2 separate shades (standard)
- Control Positions (R or L)
- Spacer Blocks
- Extension Brackets
- Hold-Down Brackets
- Back Cover for Inside or End Mounts
- Dust Cover for Outside Mounts

Note: Hardware Color Substitution is only available when the Fabric-Covered Headrail option is not selected. Please review Collection Information pages for Coordinating Hardware Color

Note: When Fabric-Covered Headrail is selected the underlying headrail color will always be white and the end caps will still be color coordinated.

SIZE STANDARDS	Standard Loop	Retractable Cord

FEATURES & OPTIONS

FEATURES	
# of fabric styles	16
# of Colors	129
Headrail size	3-1/4" X 3-1/16"
Bracket style	Snap-in
Cord loop tilt and lift	Yes, Standard
Raise, lower and tilt with one cord	Yes
Safety cord tensioner	Color Coordinated
Warranty	Lifetime Limited

OPTIONS - EXTRA CHARGE	
Hardware Color Substitution	Yes
Retractable Cord Control*	Yes
Cordless Lift <small>Not available as Two-on-One headrail</small>	Yes
PowerWand	Yes
Bliss Automation	Yes
Somfy Automation	Yes
OPTIONS - NO CHARGE	
Fabric Covered Headrail	Yes
Tilt Only (available on standard loop control only)	Yes
Two-On-One Headrail Option <small>Not available with Cordless Lift</small>	Yes
Control positions	Right or Left
Motor Positions- Bliss, Somfy	Right or Left * (see note below)
Control Positions PowerWand	Right or Left
Wand Color - PowerWand	White, Black, Brown, Vanilla, Gray
Wand Length - PowerWand	1 ft, 2 ft, 3ft, 4 ft, 5 ft, 6ft
Spacer blocks	Yes
Extension brackets	Yes
Hold-down brackets	Yes
Back cover (Inside or End Mounts)	Yes
Dust cover (Outside Mounts)	Yes
Cord length (See Cord Loop Drop Chart)	Yes
Specialty shapes	No
Tile cut-out	No

* Retractable cord length will be 40% of shading height.

Note: For 2 on 1 shades, motors must be placed at the edges(far-left and far-right) of the shades.

CORD LOOP DROP CHART

SHADING HEIGHT	CORD LOOP DROP
16" to 26-7/8"	1 ft. (white-only)
27" to 39-7/8"	2 ft.
40" to 59-7/8"	3 ft.
60" to 83-7/8"	4 ft.
84" to 107-7/8"	5 ft.
108" to 120"	6 ft. (white-only)

OPTIONAL CORD DROPS (White Cord Only)	
CORD DROP	INCREMENTS
6' – 12'	6" increments
12' – 16'	12" increments

NOTE: 18" white only cords available upon request

MOUNTING REQUIREMENTS

INSIDE MOUNT	
Standard, Cordless, Retractable Cord, Bliss Automation, Somfy Automation & PowerWand	
Minimum casement depth*	1"
Minimum casement depth*, fully recessed	3-3/8"
Minimum rear fabric clearance	1/8"

OUTSIDE MOUNT	
Standard, Cordless, Retractable Cord, Bliss Automation, Somfy Automation & PowerWand	
Minimum mounting surface height	1"
Recommended width overlap per side	3"
Minimum rear fabric clearance	1/8"

END MOUNT	
Standard, Retractable Cord, Bliss Automation, Somfy Automation & PowerWand	
Minimum mounting surface depth*	1-1/4"

NOTE:

- Add 1/4" to minimum depth dimensions if optional back cover is used for inside or end mounts
- End mount not available on Cordless Lift and 2-on-1 applications

The external battery pack available for Bliss 1.1 DC or for Sonesse 28 WireFree RTS / ZIGBEE DC are approximately 10" in length and 1" x 1". Consider ordering one of the Battery Pack Extensions below for mounting flexibility.

BLISS

48" Battery Pack Extension (Motor to Battery) Part #62207000

SOMFY

10" Battery Pack Extension (Motor to Battery) Part #9018623

48" Battery Pack Extension (Motor to Battery) Part #9016736

96" Battery Pack Extension (Motor to Battery) Part #9018624

FINISHED DIMENSIONS

STANDARD CORD LOOP & RETRACTABLE CORD TWO-ON-ONE HEADRAIL	
(not available with Cordless Lift)	
Fabric width	1-1/4"
Gap between fabric panels	3/8"
FABRIC GAP – End Gap to Fabric (Gaps On Each Side)	
Control Side	5/8"
Idle Side	3/8"
Both Sides - Cordless Lift	1/2"

OPTIONS

RETRACTABLE CORD

Raise, lower and tilt shadings with one retractable cord. The cord length remains constant when shading is raised or lowered, making it ideal in homes with children or pets. Cord length will be 40% of the shading height and may be shortened for enhanced child safety.

TWO-ON-ONE HEADRAIL

Cover patio doors and other large expanses by placing two independently operated shades side-by-side on the same headrail. Note there will be a 3/8" light gap between the two shades, see minimum/maximum requirements under product specification section.

CORDLESS LIFT

Raise, lower, and tilt shadings with cordless lift. A great choice for homes with children and pets, the lift, lower, and tilt mechanism are all controlled by the clear plastic handle attached to the bottomrail.

With your thumb on the front of the handle and fingers on the back, gently pull down to lower the shading. The hinged handle elegantly retracts when released. Continue pulling on the handle to lower the shadings and open the vanes.

To close the vanes and raise the shades, gently pull down on the handle (about 1") and release. The vanes will close and then the shading will retract into the headrail.

TILT ONLY SHADING

Ideal for sidelights or narrow windows.

- Shading cannot be raised, it can only be tilted open or closed.
- Hold down brackets are used to secure the bottomrail.

FABRIC-COVERED HEADRAIL

Features a coordinating fabric wrapped onto the headrail to provide a soft fabric look from top to bottom. (See surcharge on pricing pages)

Note: Hardware Color Substitution is only available when the Fabric-Covered Headrail option is not selected

Note: When Fabric-Covered Headrail is selected the underlying headrail color will always be white and the end caps will still be color coordinated.

OPTIONS

OPTIONAL BACK COVER (INSIDE MOUNT)

Used with inside mounts to conceal the open rear side of the headrail for a more pleasing exterior look. Use of the back cover adds 1/4" to minimum inside mounting depths.

BACK COVER BRACKET

When a back cover is used, attach back cover brackets to the installation brackets before mounting them. Remove the tab from the top of the back cover brackets and both tabs at the rear of the installation brackets.

After mounting the installation brackets, install the back cover.

ADJACENT SHADINGS

To span wide window openings, sheer shadings may be installed adjacently, so their headrails abut. The gap between the fabric panels of the adjacent shadings varies according to the control placement, as shown in the table below.

CONTROL PLACEMENT	
Adjacent (Abutting)	Sheer Shadings
Left/Right Shadings	Center Gap
Right/Right Controls	3/4"
Left/Left Controls	3/4"
Right/Left Controls	1-1/16"
Left/Right Controls	1/2"
Sheer shadings are not recommended for bay windows or butt-and-pass applications.	

OPTIONAL DUST COVER (OUTSIDE MOUNT)

Shields the fabric and internal headrail components from dirt, dust, and other contaminants.

SIDE-BY-SIDE VANE ALIGNMENT

When sheer shadings are installed side by side, vane alignment can be guaranteed within 1/4" only if:

- Shadings are ordered at the same time and in the identical style, color and height.
- Shadings that need to be aligned are specified on the order form (a note must be included in Special Instructions).
- Shadings exceeding combined width of 120" cannot be guaranteed

Note: Vane alignment cannot be guaranteed for Two-On-One Headrail and motorized shadings combined on the same order.

ADDITIONAL NOTES

SHADING ADJUSTMENT

Shadings should wind evenly and not skew to one side.

A balance weight on the bottomrail can easily be adjusted if the fabric winds unevenly on the roll when the sheer shading is raised. Uneven winding can cause damage to the edge of the fabric.

- If skewing does occur:
 - Ensure headrail was installed level; shim if necessary.
 - To release, insert a flat blade screwdriver into the weight lock and turn clockwise.
 - Adjust placement of weight in bottomrail, 1" at a time, toward side where fabric is gathering.
 - Secure the weight locks in position by turning them counter clockwise, after making the adjustment.
 - Raise shade, then lower, if necessary, adjust again.

SHADING INSTALLATION

To mount the shading, insert the top of the headrail into the brackets between the locking tab and the bracket flange. Push the headrail into the brackets until the locking tab clicks in place.

To remove the shading, lift the locking tab to release the headrail, rotate the headrail forward, and pull it straight out.

MAGNETIC HOLD-DOWN BRACKETS

Magnetic hold-down brackets secure the bottom of the shading to prevent swaying. Available upon request. Standard on tilt-only shadings.

STANDARD SHADING OPERATION

STANDARD SHADING OPERATION

Shadings are operated using a continuous cord loop. As shown in the illustration below, from the fully raised position [1] pulling down on the rear half of the cord loop lowers the shading [2, 3]. After it is fully lowered, continuing to pull down on the cord pivots the bottomrail and opens the fabric vanes [4]. When the vanes are fully open [5], limit stops in the headrail prevent further movement in that direction.

With the fabric vanes fully open, pulling down on the front half of the cord loop first closes the vanes [6, 7] and then raises the sheer shading [8]. When it is fully raised [1], limit stops again halt shading movement, preventing the bottomrail from being retracted too far into the headrail.

Light Control

With the shading in the fully lowered position, the continuous cord loop is used to adjust the fabric vanes from open to closed, and anywhere in between. Light control is at your customer's fingertips. (Note: The degree of maximum vane closure varies slightly from the top to the bottom of the shading.)

Vane Opening

Vane opening is the amount of unobstructed visibility between fully open vanes when looking through the shading at eye level. Vane opening for shadings is 1" to 1-1/2" depending on vane size and opacity.

- 2" Light Dimming = 1"
- 2" and 2-1/2" Translucent, 2-1/2" Light Dimming = 1-1/4"
- 3" Translucent and Light Dimming = 1-1/2"

Vane Closure

When the vanes of a sheer shading are closed, they overlap each other, blocking the view. However, the vanes do not contact each other along the full length of the shading – they do not form a perfect seal against light leakage. This is most visible toward the bottom of the shading.

Vane closure is measured as the distance between the front and rear fabric facings 6" up from the lowest point of the bottomrail, with the shading fully lowered and the vanes closed, as illustrated here. Vane closure for all fabrics is 1".

Note: The degree of maximum vane closure varies slightly from top to bottom of the shading.

- Over-rotation can occur when the shading is completely lowered and vanes are opened. The bottom rail turns up to the inside of the opening when the vanes are in the horizontal position.

Note: Over-rotation is an inherent characteristic of Sheer Shadings. The amount of over-rotation may vary from shade to shade.

PLEASE NOTE:

- Cord tensioner **MUST** be mounted to window casement or wall in order for the shade to operate.
- As with all textiles, Sheer Shading fabrics are subject to some variations. Slight wrinkles, puckering or bowing is inherent to textile products and should be considered normal, acceptable quality.

OPERATION

RETRACTABLE CORD

To Lower the Shading

To lower shading and open vanes, pull cord toward the center and down in long even strokes. Note: Allow cord to fully retract between each stroke.

To Close and Raise the Shading

To close vanes and raise shading, pull cord straight down or down and slightly out using long even strokes.

CORDLESS LIFT

Raise, lower, and tilt shadings with cordless lift. A great choice for homes with children and pets, the lift, lower, and tilt mechanism are all controlled by the clear plastic handle attached to the bottomrail.

With your thumb on the front of the handle and fingers on the back, gently pull down to lower the shading. The hinged handle elegantly retracts when released. Continue pulling on the handle to lower the shadings and open the vanes.

To close the vanes and raise the shades, gently pull down on the handle (about 1") and release. The vanes will close and then the shading will retract into the headrail.
