### ***S2S 2053 Recovery Oriented Methadone Maintenance***

***White and Mojer-Torres***

***Northeast ATTC/Great Lakes ATTC/DBHMRS, 2009***

#### **Module 1 Pre Test**

1. ROMM provides an alternative to acute care (heroin detoxification) and \_\_\_\_\_ care (long term medication as a form of social pacification)
  - a. preventative
  - b. post acute
  - c. palliative
  - d. none of the above
  
2. Recurrence of symptoms can occur even with medication adherence, most often when larger aspects of the patient's \_\_\_\_\_ health are disrupted.
  - a. biological/psychological
  - b. social
  - c. spiritual
  - d. all of the above
  
3. Intractable (hard to treat) addicts, most with \_\_\_\_\_, were maintained on morphine or opium by their physicians, or, more commonly were subjected to ineffective and potentially lethal withdrawal schemes.
  - a. psychiatric disorders
  - b. chronic medical problems
  - c. criminal histories
  - d. all of the above
  
4. \_\_\_\_\_ nearly died as an organization in 1959 and did not generate a viable service structure or sizeable membership until after methadone maintenance was pioneered.
  - a. Alcoholics Anonymous
  - b. Narcotics Anonymous
  - c. Al-Anon
  - d. Addicts Anonymous
  
5. In 1964, Dr. Vincent Dole, Dr. Mary Jeanne Kreek and \_\_\_\_\_ led a research project at Rockefeller Institute to develop a medical treatment for heroin addiction.
  - a. Dr. Marie Nyswander
  - b. Dr. Ian Cameron
  - c. Dr. Richard Goldberg
  - d. Dr. Theodore Krinsky

6. The involvement of the other staff in the MM pilot project shifted the goal of MM from palliation to an active and highly individualized process of \_\_\_\_\_.
- harm reduction
  - recovery management
  - dosing and administration
  - socialization and community reintegration
7. According to the authors, recovery orientation in the evolution of MM was limited by two aspects: MM treatment was aimed specifically at remission/reduction/ cessation of heroin use without a focus on a larger construct of \_\_\_\_\_, and that primary emphasis was placed upon the importance of pharmacological stabilization.
- recovery from addiction
  - 12 step supports
  - wraparound services
  - community integration
8. In 1967, there was a \_\_\_\_\_ waiting list for admission into New York MM clinics.
- 6 month
  - one year
  - 18 month
  - two year
9. In 1971, two members of Congress returned from a visit to Vietnam and reported that “\_\_\_\_\_ of GIs were addicted to heroin.”
- 5-10%
  - 10-15%
  - 15-20%
  - 20-25%
10. The most significant factor that brought MM back into favor in national policy was \_\_\_\_\_.
- ever increasing drug related crime rates
  - MM’s documented reduction of HIV transmission rates
  - new leadership in the “drug czar’s” office
  - none of the above
11. In 1988, \_\_\_\_\_ of MM patients received suboptimal doses (less than 60 mg) daily.
- 62%
  - 74%
  - 88%
  - 91%

12. A 2009 analysis of MM programs in the U.S. found that \_\_\_\_\_ of all patients pay out of pocket for their own treatment, at an average cost of \$4176 per year.

- a. 20%
- b. 25%
- c. 50%
- d. 66%
