To quickly search for a book in this catalog, use the "Find" function of your Internet browser. We are glad to be able to provide you with Catalog 28, which lists 308 items relating to the Grand Canyon, Colorado River and The West. When more than one copy of a title is offered, it will be listed as (A), (B), etc. under the item number. Be sure to reference both the item number and the letter when ordering one of these. Those of you who are familiar with our catalogs have seen the notation "Farquhar" included with certain items and are aware that this indicates the title was included in Francis Farquhar's 1953 bibliography of 125 significant works on the Colorado River and Grand Canyon. Now, you will also see a "Ford" notation included with titles that are in Mike Ford's 2003 bibliography of 225 significant works on the Grand Canyon, Colorado River, Green River and Colorado Plateau. If you haven't found what you are looking for in this catalog, please send us a copy of your "want" list. This is only a small percentage of our stock, so we may have what is on your "want" list. River/Canyon literature. Farquhar: "Stirred by the omission of the names of the Howlands and Dunn from the Powell memorial monument at Grand Canyon, and by lack of faith in Powell's own statements, Bass presents here previously unpublished passages from a manuscript written long after the event by Hawkins, one of the original Powell party. To this is added James White's letter of 1867, offered in proof of White's priority in the Grand Canyon. Useful but not entirely convincing documents." Scarce. Farquhar 49. Following the route of the famous old Santa Fe Trail, this railroad has pushed steadily onward until today it is one of the world's greatest railroad systems. And the Santa Fe is great because of the imagination and prophetic foresight of a very few leaders. "Commencing with the Santa Fe trail, I have brought this story down to the year 1887. From the reader's standpoint there are a number of good reasons for concluding the narrative in 1887. It was in this year that the Santa Fe built its line into Chicago and thereby became a transcontinental system; it was in 1887 that the passage of the Interstate Commerce Act marked a new era in railroad history; and it was in this year that the Santa Fe completed the colonizing of its land-grant." Arizona Historical Society, Tucson, 1972, 8vo., tan cloth, map endpapers, 233pp., illus., index. This publication of Charles C. Colley's guide to the manuscript holdings of the Arizona Historical Society library at Tucson is a welcome event not only for historians of Arizona history, but for historians across the Southwest. San Diego, in the southwestern most corner of the Southwest, shares many historical themes with southern Arizona. The Arizona Historical Society collections contain diaries of several people who traveled a route to San Diego by way of Tucson and Yuma, including Judge Benjamin Hayes, who journeyed from Socorro, New Mexico, to Warner's Ranch in 1849-50, and the reminiscences of J. T. Warner, for whom Warner's Springs is named. Persons interested in the history of mining, the cattle industry, railroads, Anglo-Indian relations, Anglo-Mexican relations, biography or genealogy will find this collection especially rich. The Arizona Historical Society has performed a great service in making the extent and variety of its holdings better known to researchers outside the Tucson area. In his chapter "Into the Bowels of the Earth" (pp.330-349), Cox writes of the Grand Cañon, the course of the Colorado River, the massive rock walls a thousand feet high, and he has a good historical understanding of J. W. Powell and the Brown-Stanton Expedition. Cowboys, Indians, railroads, Mormons and General Custer all make appearances in this most informative read. 16. Dutton, Clarence E. TERTIARY HISTORY OF THE GRAND CAÑON DISTRICT. GPO, Washington, 1882, text is 4to., 264pp., 42 illus.; atlas folio, 23 plates 16"x33". "One of the greatest, if not the very greatest of all Grand Canyon books..." The atlas, containing the superb panoramic views by William H. Holmes and artwork by Thomas Moran, is a rich portfolio of art as well as a collection of maps and an exposition of geology." [Farquhar] This work was important both as a work of art and as the scientific foundation upon which subsequent mapping was based, making it one of the most popular cartographic works devoted to the Grand Canyon. This set ranks No. 1 among all titles most avidly sought by River-Canyon collectors. Farquhar 73. Atlas and monograph set. ATLAS: All plates are VG+, no damp stains, no offsetting, tears, folds. A rarity in this title. The cover and title are clean and bright. 17. Dutton, Capt. Clarence E. THE PHYSICAL GEOLOGY OF THE GRAND CAÑON DISTRICT. GPO, Washington, 1882, 4to., original brown cloth, 588pp., index, illus. In the USGS Second Annual Report, 1880-81. This Dutton monograph alone occupies 117 pages, with numerous illus. by Thomas Moran, W. H. Holmes, and others, including several foldouts apparently borrowed from Dutton's monumental TERTIARY HISTORY OF THE GRAND CAÑON DISTRICT and its related Atlas. This superb paper is one of several in the same volume, including Gilbert's "History of Lake Bonneville," Emmon's "Geology of Leadville," and Becker's "Geology of the Comstock Lode." Each of these, including the Dutton, is an abbreviated version of a longer monograph later published separately by the USGS. The Dutton paper, a condensation of his TERTIARY, has received little notice in Canyon studies and bibliographies. Farquhar does not mention it. Yet it has to be one of the key geological documents in Canyon literature. And as it is less scarce than the TERTIARY, it is more accessible to collectors. This copy has the large full-color map of the Green, San Juan and Colorado Rivers. Rebound using original boards, new spine with original title laid on, a nice copy. VG with a VG map. Corners rubbed, some minor bumping o/w a nice copy. . . . . \$425.00

His crew, mostly college men, were novices on the river with the exception of Parley Galloway, son of the great riverman Nat Galloway. Their experiences were in marked contrast with those of most other voyagers, for every mile seems to have presented a life and death issue. Yet, notwithstanding the awful risks, Clyde and his boys made a good job of it, and he certainly wrote an entertaining book." Farquhar 55a.

Eight panoramics by Egloffstein; 12 full-page engravings, and 7 Indian plates, reproduced here in colors! In addition there are 41 woodcuts. Farquhar has high praise for Ives: "...one of the most desirable books in the Colorado River field, for it is the first that deals specifically with the river itself. Moreover, the illustrations are remarkable: those from Möllhausen's sketches are often admirable...two from photographs represent perhaps the first use of the camera in Arizona, certainly on the Colorado River." J. S. Newberry's contribution as expedition geologist is specially significant, for Newberry was the first to postulate a geologic theory on the origin of Grand Canyon. Farquhar 21.

30. Johnston, Abraham Robinson, Marcellus Ball Edwards and Philip Gooch Ferguson (edited by Ralph P. Bieber). MARCHING WITH THE ARMY OF THE WEST, 1846-1848. The Arthur H. Clark Company, California, 1936, 8vo., red cloth w/gilt, 368pp. "President Polk issued a proclamation on May 13, 1846, announcing the existence of a state of war between the United states and Mexico. on the same day the war Department began to organize an expedition to seize New Mexico. Known as the 'Army of the West,' this force, with replacements and reinforcements, performed valuable service in different parts of the Southwest during the conflict. It occupied New Mexico and parts of California and Chihuahua, defeated the Mexicans in the battles of Bracito (1846), Sacramento (1847), and Santa Cruz de Rosales (1848), constructed forts in the newly-occupied territory, made peach with some of the Indian tribes, opened roads, and explored a portion of the country. Very active throughout the war, it helped to prepare the inhabitants for the change from Mexican to American rule. The journals of Abraham Robinson Johnston, Marcellus Ball Edwards, and Philip Gooch Ferguson, which are here published for the first time, throw new light on the varied activities of the Army of

the West between 1846 and 1848." VG+. . . . . \$145.00

31. Johnston, Brevet Lt. col. J. E., et al. REPORTS OF THE SECRETARY OF WAR, with Reconnaissances of Routes from San Antonio to El Paso. Senate Ex Doc. 64, 31st Congress, 1st Session, GPO, Washington, 1850, 8vo., 250pp., one folding map, 72 lithographed plates, several handcolored, some folding (plates are numbered to 75; plates 2, 21 and 39 were not issued). Also, the Report of Capt. R. B. Marcy's Route from Fort Smith to Santa Fe; and the Report of Lieut. J. H. Simpson of an Expedition into the Navajo Country; and the Report of Lieutenant W. H. C. Whiting's Reconnaissances of the Western Frontier of Texas. This report was most important for the opening of travel and settlement in West Texas and New Mexico. By these explorations, a supply and potential railroad route was surveyed across West Texas, and this became the main passageway for soldiers, settlers and gold seekers. The surveyors were pleased with what they saw, pointing out the large population which could be supported in the Rio Grande Valley, as well as the strategic importance of El Paso. The Simpson report is one of the first thorough surveys in New Mexico. Related to it are the many handsome plates, as well as one of the maps. The other map shows the routes across Texas. The plates with the Simpson report make it an important American color plate book. Original binding, former owner's name penned and dated 1884, some foxing and darkening of a few pages. Original embossed boards front and rear, bright original gilt title on spine, corners bumped. Three foldout drawings. Overall a nice very original copy with no obvious repair. brown cloth w/gilt, 233pp., many photos. The author died at the young age of 27 in May 1909. He had much talent, still undeveloped and rich in hope, which found partial expression in literary fragments left unpolished and untrimmed. Uncertain of his calling, he went west -- to Arizona -- and his vivid nature was awakened. He was overwhelmed by the wonder, the beauty, the immensity of God's Country. Here he tells of his rides across the deserts, his exploration of strange Indian towns and his observation of weird customs. In this book are passages of lavish beauty and vivid interpretation, along with over 120 photographs. Chapter titles are God's Country; At the Gates; The Valley of the Rio Grande; To Acoma, The Pueblo of the Children of the Sun; On the Trail of the Conquistadors, from Acoma to Zuni; In Zuni, the People of the Plain of Cibola; Among the Nomad Navajo, the Shepherd of the Hills; The Unremembered People; The Children of the Sands; The Snake Dance; and the Grand Cañon. 46. Powell, John Wesley. CANYONS OF THE COLORADO. Flood & Vincent, Meadville, PA, The Chautauqua-Century Press, 1895, large 4to., rebound in 3/4 brown leather w/gilt, , top edge gilt, more than 250 illustrations, frontis. portrait of heavily bearded Powell with his facsimile signature. Howes (P527) calls this "The first complete narrative" [of Powell's famed transit of the Colorado river]; his earlier reports were largely devoted to scientific data." Scores of this edition's illustrations appeared first, and probably only, in this account. Farquhar (43) gives the Meadville a separate listing because "it differs in so many respects from the report of 1875...Not only has the narrative been revised and augmented, but there are several new chapters and a great many new illustrations. Included in the latter are adaptations from the superb sketches of William H. Holmes which are featured in the Dutton atlas. Altogether, it is a handsome book, and also a scarce one." "Scarce" is an understatement: it is believed, by some Powell experts, and by Van Allen Bradley, that only a hundred or so copies of the Meadville ever reached the marketplace, so the copy offered here may be literally "one in a hundred." Darrah, in his POWELL OF THE COLORADO, says the Major was handsomely paid for his writing. He planned, said Darrah, to save the money toward purchase of a summer cottage "on some rocky

shore of the ocean." Powell ultimately made this dream come true. He passed away in his Haven, Maine waterfront cottage in 1902. Farquhar 43. This copy has been rebound in maroon cloth with 3/4 leather, leather spine and corners, title in gilt, the spine has raised ribs and stamped decoration. 47. Powell, John Wesley. EXPLORATION OF THE COLORADO RIVER OF THE WEST and Its Tributaries Explored in 1869, 1870, 1871, and 1872 Under the Direction of the Secretary of the Smithsonian Institution. GPO, Washington, 1875, 4to., rebound in 3/4 leather w/gilt, 291pp., 80 illus. on 68 sheets (many by Thomas Moran), original map and profile in rear pocket. This is Powell's monumental report on his two River expeditions, combined to read as if there had been only one voyage. The core volume in any comprehensive River/Canyon library. Whatever the book's shortcomings, says Wallace Stegner, "no matter how many boatmen run the river in the future, or swim it, or go down it in barrels or on inflated inner tubes, this is the river story that will always have readers. For reasons that will be apparent to anyone who opens it, it is truly one of the great tales of adventure." A beautiful new rebind in maroon cloth with 3/4 brown leather spine and corners, gilt title, raised ribs and decorative spine, new endpapers, makes this a particularly handsome copy. VG+ externally, VG internally with some very faint, small library stamps. This copy was rebound to match the 1895 "CANYONS OF THE COLORADO" by J. W. Powell. The group left Santo Domingo NM on August 1, 1851, stopped at Zuni in September and arrived at San Diego on November 30. Kern's drawings of the Zuni Indians doing the "Buffalo Dance" was the first and perhaps the only depiction of the seldom-performed dance with heat. S.W. Woodhouse contributed the general natural history report as well as those on mammals, birds and medical aspects; Hallowell reported on reptiles, Torrey on botany; and Baird and Girard covered fishes and Kern contributed the handsome views and illustrations of the Indians. Stone. Farquhar calls CRC "a highly important book," adding the caveat that it should "not be evaluated without a careful examination..." The "controversies" in CRC are (1) James White versus J. W. Powell, each claiming to be first down the Colorado River through the Grand Canyon, and (2) the true story of what happened at Separation Rapid, where three members of Powell's crew left the party, and were soon after killed. The text of CRC contains only "fragments from Stanton's truly prodigious researches; it is a pity that his entire manuscript could not have been published."
