

FEATURES/BENEFITS

- 1 Wood parting stops and absence of screws provide a warm, clean look.
- 2 Integral aluminum nailing fin as part of the frame offers superior strength and rigidity.
- 3 Heavy-duty interlock improves air and structural performance.
- 4 Two-point locking system for added security.
- 5 One-piece pultruded fiberglass thermally-broken sill enhances thermal and water performance.
- 6 Aluminum jamb covers at the head and strike jambs hide exposed screws and provide a smoother, more attractive surface.
- 7 End adjust ball bearing rollers provide easier adjustment.
- 8 Improved breakaway force of panel (10 lbs) and operating force (6 lbs) provide effortless operation.
- 9 Taller sill provides excellent water performance and design pressure ratings.
- 10 Foam-backed glazing bead prevents paint and stain from bleeding.
- 11 Stiles and rails constructed of Ponderosa Pine core and skins provide a rich appearance and increase durability.
- 12 Panel exterior matches Pinnacle product line with consistent depth from glass to face of the panel for a clean, complementary appearance.

SIZES

- Available in four standard heights: 6'8", 6'10", 8'0" and 9'0" (French slider only).
- Custom sizes also available.

GLAZING

- Interior stop glazed with beaded silicone.
- Standard 3/4" tempered double pane clear insulating glass.
- LoE 366, tinted, tempered, laminated and obscure glass types.
- Custom glass types available.

GRILLE OPTIONS

- Windsor Divided Lite (WDL) – Simulated divided lite.
 - Standard profile in 7/8" or 1-1/4"
 - Putty profile in 5/8" or 7/8" (exterior only)
- 13/16" flat, 3/4" profile and 1" profile inner grille.
- Standard and custom grille patterns available.

WEATHERSTRIPPING

- Flexible, weatherable PVC and foam seal are located at the head and jambs with a pile fin-seal weatherstripping at the interlocks. Pile weatherstrip is also used at the bottom of the operating panel and at the ends of the interlock.

INTERIOR FINISHES

- Three distinctive wood species:
 - Clear Select Pine
 - Natural Alder
 - Douglas Fir
- Painted white interior finish.

EXTERIOR FINISHES

- Primed – Latex primer prepares the exterior surface for paint.
- Aluminum clad – Windsor's extruded aluminum cladding is exceptionally durable and dent resistant. The finish is electrostatically applied and baked-on to prevent fading and chipping.
 - 7 standard cladding colors include white, ivory, tan, bronze, hunter green, cinnamon or black.
 - 30 feature colors and custom color matching is also available.
 - 8 anodize finishes provide a unique metallic appearance that is offered in clear, champagne, light bronze, medium bronze, dark bronze, extra dark bronze, black and copper.

HARDWARE

"D" handle is available in white, black, brass, antique brass, polished chrome, brushed chrome, satin nickel, antique nickel, faux bronze and oil rubbed bronze.

PERFORMANCE RATINGS
