

MADE IN THE USA

All of the materials and components integral to the functioning of the Clear Beer Draught System are sourced and manufactured in the USA. The included small dip tube that replaces your kegs original long dip tube is currently manufactured in Italy.

Even a small product such as this reaches out to many sectors of our economy. Materials, manufacturing or assembly originate from Alabama, Arizona, California, Connecticut, Georgia, Massachusetts, Ohio, and Pennsylvania. It is with great pride that I am able to bring to market a product that gets the stamp “MADE IN THE USA”.
