THE WINNER IS...

The votes have been counted and the FRAKENSTEIN pumpkin won (Primary class)!! All of the pumpkins were amazing. Thank you to all of the teachers for being so creative and giving our families some awesome pumpkins to choose from.

The winning class will receive a cookie decorating party!!

PARENT TEACHER CONFERENCES

Parent teacher conferences will be held **November 6th through November 17th**. A signup sheet has been posted in the lobby of the school. This is a great opportunity to meet with your child's teacher to discuss their development.

SCHOOL PICTURES - MONDAY, NOVEMBER 5th

This Monday are our annual school pictures. Informational flyers went out earlier this week. Please return them no later than Monday showing your solid background preferences. All students will be getting photos taken with the holiday background and a solid background.

ATTIRE: Students do not need be in uniform for the pictures. **Nice, holiday attire is suggested.** Please provide a change of clothes so the teachers can change students afterwards.

NOVEMBER'S THEMED UNIT OF STUDY

In addition to our core curriculum (Practical Life, Sensorial, Language, Math, and Culture) our students get a themed unit of study each month. This month we will be focusing on

TRANSPORTATION. Over the course of this month the weekly themes will be Ground, Air, and Water transportation. Students will also be focusing on Orange & Brown, the Triange shape, and letters **G, H,** and **I**.

THANKGIVING FEAST

We will be having our **Thanksgiving Feast Wednesday, November 21st**. CHM will provide a school lunch for all students. A signup sheet will be posted for each class giving parents the opportunity to bring items for the feast (paper plates, flowers, cups, table clothes, etc.)

We will also be **RELEASING EARLY (12:00pm)** this day to kick off our Thanksgiving break.

THANKSGIVING BREAK - SCHOOL CLOSED

We will be **CLOSED November 22nd and 23rd** to allow our teachers and staff the opportunity to celebrate Thanksgiving with their family. November 21st will be an early release day (12:00pm).

- The \$100 credit will be applied to the tuition following the first month of the referred student.

PARENT REFERRAL PROGRAM -GET \$100

We love referrals and we love you...so much so we want to give you **\$100 tuition credit** If you know someone who is looking for child care we would love to show them around and put some extra money in your pocket.

TUITION IS DUE

Just a reminder that tuition is now due. You may pay either by credit card, cash or check. If you want to keep your credit card on file please fill out our Credit Card Authorization form ([found here](#)). We can auto draft your payment or processes it once instructed.

MONTESSORI FOCUS - BIOLOGICAL SCIENCE

Our monthly feature focusing on one piece of Montessori material, approach, or philosophy to give parents an insight into their child's education while in our care.

This month our feature is an overview of **BIOLOGICAL SCIENCE, BOTANY AND ZOOLOGY PUZZLES.**

The interest in nature is a natural thing in every human being since the beginning of time. Children have a great, natural interest in living things and biology is the study of living organisms, plants and animals. The child is naturally fascinated by "real and living things".

There are two major areas of biology. The first is zoology, which is the scientific study of animals, their structure, physiology, classification, and distribution. The second is botany, which is the study of the classification of plants, their physiology, their structure, their ecology, distribution and economic importance.

The young child is taught the structure of plants and the distribution on a geographic level. In zoology the major divisions are taught: vertebrates and invertebrates. The five groups of vertebrates are: amphibians, mammals, birds, fish, and reptiles.

All of these experiences are given on the oral level first by the teacher, followed by more advanced student lead applications. Some of these advance applications include students identifying individual parts of the whole and categorizing objects into the different zoology divisions.

Later, in Elementary, students will delve more deeply into these different groups and sub-groups of biology but for the Montessori Primary class, the child is only taught biology as in introduction and to have the awareness of the living organisms in our world.
