

Carbon Fiber Technology
Patent in China & Taiwan.

Heated Healthcare Blanket

Fast Heat Up

Re-Chargeable

No Electro
Magnetic Field

Hand Wash

Portable Design

3 Level Heating

Relax Muscle Spasms
Reduce Chronic Pain
Improve Circulation
Generate Soothing Warm
Boost Metabolism &
Immune System

SUN-HBKMW-M1 Medical heated blanket

- Material: Deep coffer Nylon with TPU
- Inside Material : 100% warm polyeaster
- Blanket Size : 90 x 170cm
- Battery (7.4V / 5200 mA) (42W power), size : 6.8 x 8cm.
- 2 heated modules (size : 35*25cm) up and down side with special
- Special Sensor to control the blanket temperature : Carbon Fiber Heating Modules used to generate warmth under medical norms, without any metal materials used.
- Temperature Sensor: Controller to keep blanket surface not more than 41°C. (Lab Temperature 25°C).
- "R" Angles : Blanket 4 corners process with 'R' angle .
- Dual Zone controller : with High/Middle/Low 3 sections temperature controls
- Control Temperature Sensor : Shall be settled in a suitable position to manage temperature.
- Battery run time: High temperature 3.5 ~ 4 hours.
- Special Power Notification Feature : When battery power under 20%, the push button shall start flashing , regardless which setting is choosen indicating the last 20% power state reached.

⚠ WARNING

Innovation for Your Well-Being

- ✓ Please use carefully, may cause serious burns, consult your physician if pain persists.
- ✓ Do not use over open wounds, sensitive skin areas, or in the presence of poor circulation
- ✓ The unattended use of this heated therapy wrap by children or incapacitated person may be dangerous.
