

# Swiftwater Rescue Technician Advanced (SRTA)

---

This course integrates techniques learned in **SRT1** and **TRR: TL**, taking the students beyond the emphasis on self-rescue to concentrate on victim rescue. Students are exposed to more complex water rescue situations including a mock night river rescue scenario. The three day course includes 4-6 hours of classroom instruction, followed by two and one-half days of hands-on skill development.

Students are introduced to the role and utilization of various skills in river and flood rescue, including

- rope systems
- management of litter & patient raising systems
- highline systems
- advanced river search concepts
- performing rescues at night or in low visibility
- basic flood disaster management.

Completion of the SRT-A along with SRT-1 and TRR: TL satisfies the requirement outlined in NFPA 1670 Surface/Swift Water Technician Level. This qualified graduates to operate on a Swift Water/Flood search & Rescue team according to NFPA.

University level courses available at specific locations. For more information>>
