

# DISCLOSURE & RELEASE AGREEMENT FOR CUSTOM AIRBRUSHING

Please read and fill out this “Disclosure & Release Agreement” completely, making certain that you understand all information provided, and that your information is correct.

You have the right to be informed so that you may make the decision whether or not to undergo the procedure, after knowing the risks and hazards involved. This disclosure is simply an effort to make you better informed so you may give, or withhold, your consent to the procedure.

---

**Please read and INITIAL the statements below to indicate: I understand the following completely:**

- Spray tanning is accomplished by application of a solution containing the active ingredient: DHA (Dihydroxyacetone). DHA is considered to be safe and has been FDA approved.
- You will enter a private room where you will remove your clothing. This is up to you and your level of comfort. If you don't want to be fully nude, you should wear a dark swimsuit or underwear. The solution will wash out of most clothing. It is always best to wear dark loose fitting cotton clothing. It is advised to wash the undergarment or clothing worn as soon as possible after your session.
- Next, You will be sprayed. This process will take approximately ten to fifteen minutes. After spraying, your skin should be dry before putting your clothes back on and you should not bathe or sweat excessively for at least 12 hours. The solution will give you an immediate bronzing effect. The bronzing effect is a result of a coloring additive in the solution that will remain on the skin until you are actually tan. When you shower, the coloring will come off to reveal your actual tan beneath.
- All people are different. All ingredients used in this procedure are intended for cosmetic use and generally regarded as safe. There are, however, occasions where individuals may be allergic to one or more ingredients in the spray tan solution. Please ask to read the ingredients list if you have any known allergies.
- Be advised there is a small percentage of people whose skin may not react favorably to spray tanning. For this reason, we do NOT advise being sprayed for the first time when your appearance is critical (i.e. wedding/special occasion). We always recommend doing a test spray tan at least 2 weeks before your event.
- Caution – Pregnant or nursing women should consult their physician before using.

• Warning – This product does not contain a sunscreen and does not protect against sunburn. Repeated exposure of unprotected skin to U.V. Light may increase the risk of skin aging, skin cancer and other harmful effects to the skin even if you do not burn.

I have been provided with spray tan care instructions, which I have read and understand completely. To my knowledge, I have no medical condition or allergy which would preclude me from having this procedure done. I have been honest and accurate about the information that I have provided on this waiver. I take sole responsibility of any reaction I may have, staining of clothing and/or personal belongings.

I have read and completely understand this consent form.

**First & Last Legal Name:** \_\_\_\_\_

**Email Address:** \_\_\_\_\_

**Date of Birth (MM/DD/YYYY):** \_\_\_\_/\_\_\_\_/\_\_\_\_

**Phone:** \_\_\_\_\_
