

Vortex TR™ Spreader

The Vortex TR™ is a proven granular application system in the landscape, pest control and maintenance industry.

The unit is configured to perform with the most difficult to apply materials.

The Vortex TR™ is lightweight for use in utility vehicles and pickup trucks, has a large capacity hopper to eliminate going back for additional product, reducing down time. All Vortex™ spreaders can be used year round for fertilizer, pre-emergent herbicides, insecticides, granular growth regulators, ice melt products and other granular materials.

The Vortex TR™ spreader will eliminate most hand application of granular products and deliver material evenly and efficiently into ornamental plant beds, apply ice melt onto sidewalks, driveways and staircases, golf course bunkers, waterway, blueberry, citrus, and more.

- Up to 250 LB Capacity Polyethylene Inductor Hopper
- All Stainless Steel Frame
- 10 foot hose with Cordura cover for abrasion protection
- Non clogging patented delivery system
U.S. Patent #6,883,736 #7,080,961 #7,137,579 #7,337,992
- Sealed material storage to prevent material from becoming wet
- Up to 15 lbs. per minute fertilizer application rate.
(Rate Varies per Material)
- Fully adjustable valve for varied rate of material delivery
- Vortex TR™ utilizes electronic On / Off flow control at delivery hose end, giving the operator the ability to be up to 10' from actual unit
- Remote switching option separates the valve on/off control from the delivery hose. This allows for variable hose length.
- Non clogging delivery system
- Extension tubes included for longer delivery pattern
- 11 foot long granular material delivery hose
- Use Vortex TR™ in a utility vehicle or pickup truck
- Will apply mini prill, standard prill and large pellets
- Easy to use - one person operation
- 12 Volt Vibration kit is standard to insure even flow of material in humid conditions or with dusty material
- Ships Fully Assembled – Ready to Work
Dimensions: 36"L x 19"W x 46"H / Unit Weight Approx. 110lbs
- **Option: Vortex TRE – w/Electronic Rate Controller**
Electronic timed control, allows the ability to deliver measured amounts of material or manual operation for standard application
