INTRODUCING:

COLOR STATUS REPORTING

Don't let your competitors gain the technological edge. Get assistance with the newest construction software in the industry, color status reporting. View your plans like never before from any type of computer device.

What is color status reporting? Color status reporting is an enhanced way to view your schedule. On a floor plan (or site plan) you can view the status of your project through colors based on a specified status. For example, on a floor plan you can have an icon for each Sub-Contractor within a room or area. This icon changes color based on status. The Sub-Contractor can then select his current status and the color will reflect that update (the changes others make are recorded in the actual file). This concept applied to multiple sub-contractors and multiple plans allows you to see the progress of your project through an entirely different prospective. This new prospective provides more effective collaboration and communication.

Status Legend:
- (EX) No Items have Started
- (EX) Under 50% Completed
- (EX) Over 50% Completed
- (EX) Completed
- (EX) Completed and Accepted

Items Completed and Accepted   Items Completed

BUILDING 'A' - FLOOR PLAN ①

Over 50% Completed   Under 50% Completed   Not Started

BUILDING 'B' - FLOOR PLAN ②
