

AlkaViva H2 Model Water Ionizers (Melody II (H2), Athena H2 & Vesta H2) use two filters. These Filters are not compatible with earlier Model machines of the same name. In 2017 the H2 models began using Smart Filter Technology. These filters have a wire at the top that plugs into a connector in the machine. **The Original H2 Filters and Smart Filters are not interchangeable, so please be careful in your selection**

### **AlkaViva Internal .01 Ultra Fine Secondary Filter for H2 Water Ionizers**

SKU: ALK\_H2\_UF01\_FILTER \$109.95

AlkaViva Internal Ultra Fine .01M Filter for H2 Water Ionizers  
Fits Melody II, Athena H2 and Vesta H2

Also Fits Biontech Models BTM-102F, (Alkalife 7000,) 101S, 101T, 207D

Optional .01M Secondary Well Water Filter for installation in the LEFT side of your H2 Ionizer.

This filter is best used for Untreated water such as well water. Eight stages of protection highlighted by CaSO<sub>3</sub> (Calcium sulfite) to reduce heavy metals and different forms of chlorine, .01micron UF hollow fiber technology and two stages of the highest quality carbon

***Rated for 500 Gals (depends on source water condition)***

---
