Success**

In the ever important demand and need in education to collect and utilize meaningful data we often forget to train teachers as to how to effectively collect, analyze and utilize that data. This professional development segment provides a myriad of manners in which teachers can collect, evaluate, analyze and utilize meaningful data to drive their instruction.

Topics to be discussed:

- How are you utilizing data in your classroom on a daily basis?
- How are you collecting and measuring data?
- How can data be used to drive instruction?
- How can data measure student success/challenges?
- How to do a deep dive analysis of data?
- What data is being utilized, how often do we collect it and why do we use that data?
- How are students utilizing data in your classroom?
- What do your students know regarding the data being collected, analyzed and utilized in their classroom?

Key Take a ways:

- Data points, data usage and a manageable system to collect and utilize data.
- A plan as to what data you are collecting and how you will utilize that data to communicate with your evaluator.
- A clear plan as to how to collect, utilize, measure, and quantify data from students.
- A partnership with all stakeholders in the utilization of data and the creation of an open dialogue surrounding data.
- How to communicate with students in a meaningful way to enhance instruction.

We customize our packages for each individual school district based upon their needs, their wants and their challenges.
