

How it Works: NG911-Connected Smoke, Heat, and CO Alarms

1

DETECT smoke, heat, or CO and alert occupants

2

RELAY emergency data/text message via wireless telecom network

3

NOTIFY 911-dispatch center, who receives 911 emergency data/text message from alarm, then dispatches first responders

KEY ADVANTAGES
Early Notification Directly to 911 Centers and Emergency Responders

5

RESPOND to location of emergency

4

DISPATCH first responders: Fire, EMS, Police
