Phone: 706-542-6705

Course Description:

"A patient pursuit of facts, and cautious combination and comparison of them, is the drudgery to which man is subjected by his Maker, if he wishes to attain sure knowledge."

- Thomas Jefferson
Notes on Virginia Q.VI, 1782. ME 2:97

As Thomas Jefferson so aptly noted, the pursuit of knowledge in all scientific fields is based in comparison. This course will give students a broad overview both of classic debates in the study of comparative politics and of questions the field is grappling with in the present day. Some of the topics addressed in this class include weak states, transitions to and from democracy, economic development, and the effects of institutional design on political outcomes. The term "comparative politics" often refers to the politics of countries outside of the United States, therefore most examples in this class will be drawn from developed and developing political systems around the world.

By the end of the semester, students who successfully complete this course will be able to: explain the role of controlled comparison in the scientific study of politics; understand the different analytical strategies used by comparativists to answer research questions; discuss key debates in the study of comparative politics; and synthesize this knowledge in the production of memos and in-class presentations.

Required Readings:

O'Neil, Patrick, and Ronald Rogowski. 2018. *Essential Readings in Comparative Politics*, 5th Edition.

Articles from academic journals, which are available to you for free online or through the university library, and occasional book excerpts, which will be made available online.

Course Requirements:

Reading: This is a small class, and we will regularly discuss course material at length. You are responsible for reading all assigned material for each class period. Some of the

academic articles we will read are dense. You are not expected to understand all of the technical aspects of these articles. However, you are expected to make a good faith effort to identify the argument, evidence, and conclusions presented by the authors. In rare cases, readings may be adjusted during the semester.

Activities: There will be two in-class activities. You are expected to complete all associated assignments before class and to actively participate in class.

Exams: This class will have two non-cumulative midterm exams and a cumulative final.

Quizzes: There will be six announced quizzes throughout the semester that will be held at the beginning of class. If you will regularly be unable to arrive on time, please discuss this with me as soon as possible so we can find an accommodation. Without prior notification of illness or a prior accommodation, you will not be allowed to take quizzes if you arrive late.

Participation: Both the quantity and quality of your participation in class discussion and activities will be considered. Your participation in class is not just an important part of your grade, but also a sign of respect to the instructor and your peers. The academic enterprise is founded on the open exchange of ideas; to that end, we will hold regular in-class discussions. You may hold strong opinions about the topics we read about and discuss in this class. I expect you to follow the golden rule during in-class discussions and treat your classmates and their ideas with the same respect you would like to receive.

Attendance: I will not enforce a strict attendance policy in this class; do note, however, that in-class participation and quizzes account for 20% of your final grade and you can neither participate nor take quizzes if you are absent.

Grades:

Midterm Exams: 40% (20% each)

Final exam: 30%

In-class activities: 10% (5% each)

Quizzes: 10% (2% each, worst grade dropped)

Participation: 10%

Grade Scale:

$\geq 93\%$: A

90-92.9%: A-

87-89.9%: B+

83-86.9%: B

80-82.9%: B-

77-79.9%: C+

73-76.9%: C

70-72.9%: C-
 60-69.9%: D
 <60%: F

Laptops, Tablets, and Smartphones:

Laptops, tablets, and smart phones put the world at our fingertips. While technology can be incredibly useful, it is often distracting during class. Because of this tendency to distract from rather than aid learning, laptops, tablets, and other electronic devices are not allowed in this course without instructor permission. If permission is granted, you may use the equipment for the sole purpose of taking notes. All requests regarding technology must be made in person, and non-compliance with the policy will result in a failing participation grade.

Late or Missed Assignments:

The two non-reading assignments assigned for this course will inform in-class activities and must therefore be completed on time. If you do not complete the assignments, you will receive a zero for the activity unless you have a medical excuse or family emergency.

University Honor Code and Academic Honesty Policy:

As a University of Georgia student, you have agreed to abide by the University’s academic honesty policy, “A Culture of Honesty,” and the Student Honor Code. All academic work must meet the standards described in “A Culture of Honesty” found at: <https://honesty.uga.edu/Academic-Honesty-Policy/>. Lack of knowledge of the academic honesty policy is not a reasonable explanation for a violation. Questions related to course assignments and the academic honesty policy should be directed to the instructor.

Course Schedule

Week	Date	Topic and Assigned Reading
Week 1	August 14	Course Introduction – no reading
	August 16	On Science, Causes, and Making Inferences Reading: 1. Arthur Conan Doyle. 1892. “The Adventure of Silver Blaze”.
