COMPREHENSIVE REHABILITATION SERVICES

THE REHAB DIFFERENCE

QUALITY

While many other therapy programs have learned to cut services in response to the Prospective Payment System (PPS), Stephenson Nursing Center continues to provide quality, comprehensive rehabilitation services such as:

- Interdisciplinary care for a broad scope of practice and comprehensive discharge planning
- Professional restorative nursing programs to supplement and extend the therapeutic approach
- Rehab team leadership from a skilled program manager
- Outcome-based treatment programs
- Therapists who are educated in coverage and reimbursement guidelines

EDUCATION

Our therapists attend an average of three-to-four professional education courses per year, bringing fresh treatment approaches to our complex population.

The physical therapy staff at Stephenson Nursing Center specializes in neurological and musculoskeletal diagnoses, gait analysis, and balance/fall risk assessments, especially in the elderly population.

The occupational therapy staff specializes in ADL retraining and cognitive testing to help determine safe discharge destinations.

And finally, our speech therapist has experience and extensive knowledge of the geriatric population, dysphagia, cognitive assessment, language techniques and swallowing disorders.

ACCOUNTABILITY

Rarely seen today in response to cost-conscious reimbursement schemes, Stephenson Nursing Center continues its commitment to monitoring outcomes.

Now more than ever, we value tracking and trending costs, interventions, and functional benefits. The information we gain directs us in continuous quality improvement.
