

# WATERVISION

## CLOUD-BASED TELEMETRY

Monitor and Control your Water Delivery System from Anywhere, at Anytime, from Any Web-Enabled Device.

### REMOTE MONITORING

- ✓ Your data is accessible anywhere, anytime – with online data storage you are free to access your pump station from any web-enabled device.
- ✓ Monitor and Control multiple devices on your property.
- ✓ Monitor and Control multiple properties – locally, regionally, worldwide.

### ONLINE DATA STORAGE

- ✓ Proprietary Watertronics RTU automatically pushes all device event data to our Secure Data Vault – 24/7/365.
- ✓ Your data is safe – no longer at risk of computer crashes or viruses, your historical data is forever secure in our Secure Data Vault.

### MAXIMIZE SYSTEM UPTIME

- ✓ Preset event and alarm notifications automatically distributed via text or email to you and your PSN Service Partner.
- ✓ Remotely reset alarms, make system adjustments, and enable/disable pumps.

### POWER MONITORING

- ✓ Optimize Wire-to-Water efficiency by monitoring and trending both power consumption and the quality of incoming power.

### CHARTING/TRENDING

- ✓ Standard and customized trending of pump station data to help optimize pump sequencing, connected horsepower, and pressure setpoints.
