The Western View

From the President – Jim Kellie

Merry Christmas and Happy New Year everyone. I trust by now all your bees are either in the south, California, or snuggled in some warm wind protected place. Our bees looked very good this year when we arrived in Texas. I am in hopes they will continue to be strong for spring. Most of you are probably fixing things that broke during the year, putting together wooden ware, or preparing to head to one of our two national conventions. Both have excellent programs this year. Honey prices are holding very well at this time and seem to be sneaking up a little. The majority of my

honey has been spoken for and sold, but I have a little squirreled away for anyone who has emergencies. Hopefully your honey will get you to the next harvest. There still seems to be evidence of honey prices rising as it is a waiting game at this point for the large packers and producers. I have had producers tell me of Packers beginning to call around and starting to make offers. Kansas honey producers are still reporting to me that local honey is still selling very strong.

One of my favorite Christmas things to do is be Santa on the phone when the Grand-kids call the North Pole on Christmas Eve to tell Santa what they want. I go to great lengths to delight them. With the help of friends one can hear the operator transfer them to the reindeer barn where in the background you can hear elves’ tell each other how to load the sack, and reindeer being hooked up to the sleigh as Santa checks off his list and gets ready for take off. I have a few beekeeping items on my Santa list this year but I am not sure how Santa can get a new honey house, 60 frame extractors, swinger and me 30 years younger in his sack.

I hope you make some goals for your beekeeping this year and then go out to achieve them. This year has been great for me in the honey producing business, but on a personal level, was one of my tougher years. I am writing this on New Years day and my goal is to overcome those personal difficulties and keep my business producing like it did last year. My son was relating a story from his youngest daughter. She was having difficulty with one of her toys from Santa and asked Dad to fix it. He worked on it a while and commented that he wasn’t sure he could. She looked at him and said. “Daddy people don’t give up. They just keep trying until it is fixed.” It gave me hope for the future and I hope it will for you. I think she will do just fine in life. Happy Holidays and see you all at Hays in March.

Jim
His business manages 2,000 honey bee colonies for honey production, pollination services, bee production, and queen bee breeding. Clint is a Past President of the American Beekeeping Federation and Chair of the Texas Beekeepers Association/Texas A&M Liaison Committee. Clint discussed his queen and package bee operation, pollination, some of their new soap products (learned from our own Becky Tipton), honey fudge, honey peanut butter, creamed honey, and more.

We also crowned our 2010 KHPA Honey Queen, Ms. Lydia Johnson, and received a presentation from Sam Reiss, our KHPA Youth Scholarship Winner for 2009. Here are several “action” photos of our Fall meeting:

Lydia accepting the title of Kansas Honey Queen

Sam Reiss, KHPA Youth Scholarship Winner discusses his year as a new beekeeper.

Good job Sam!

In addition to Clint, we had a number of other presenters. Gary Ross discussed Honey Bee diseases and pests and my husband Ron and I talked about Kansas Food Processing Plant certification. Here are some other presenters in action:

Sharon Rowan presents "Advanced Candle Making"

See you in Hays! Beth ❖
Ms. Lydia Johnson, the 2010 KHPA Honey Queen!
By Ron Ward, Editor

During our Fall Meeting in Emporia, Ms. Lydia Johnson was selected as the 2010 KHPA Honey Queen. Lydia lives in Abilene, Kansas, is a senior at Abilene Baptist Academy, and is the daughter of Tom and Evelyn Johnson. At ABA, she participates in volleyball, basketball, and choir. She is employed as a veterinary assistant and a certified nurse’s aide. Lydia is also a member of the Dickinson County Gardening Club and the Kansas Honey Producers Association. Before recently closing its doors, she volunteered at the "No Place Like Home Animal Shelter".

Lydia is a 3rd generation beekeeper. In 2000, when she was eight years old, she got involved in beekeeping with her dad. Her late grandfather, Harry Johnson of Solomon, Kansas was a beekeeper in the 60s and 70s. She works alongside her dad feeding bees, making splits, supering, and extracting honey. She also makes beeswax candles and sells honey at the farmer's market and craft shows. Since her father works out of town frequently, she gets the "swarm call" and responds. This past summer, she mentored a new beekeeper in her community by helping him put together his hives and check and feed his bees. Lydia is active in all areas of beekeeping and enjoys passing beekeeping skills to others.

3rd Vice President Connie Hopkins will assist the Queen in coordinating her activities throughout the coming year.

We’ll keep you informed! Congratulations Lydia!
Busy as a bee. If you have observed a hive of bees at work, you know that saying is accurate. It seems bees are always working, going after nectar for the hive. Today we'll meet a family in rural Kansas that started raising bees and found that the enterprise is keeping them quite busy as well.

Steve and Becky Tipton are the owners of Country Creek Honey near Meriden, Kansas.

Steve is from north Topeka originally. His parents bought a farm near Meriden in 1967. Steve went to Washburn, married Becky, went to work at Goodyear and moved back to the farm. Becky is a teacher at Seaman High School. She has always been interested in bees and had read lots of bee journals, but hadn't tried raising bees.

One day in late 1988, Steve went to a farm store in Emporia to pick up a part for a tractor. Steve said, "It was three days before Christmas, and the store had a sign that said, 'Beginning beekeeper kits - everything you need to get started.'" He said to himself, "Yes! My Christmas shopping is done."

Now isn't that a guy's dream - to Christmas shop for his wife at the farm store? Anyway, Steve bought that beekeeper kit and gave it to Becky. They soon bought two hives of bees and have raised bees ever since.

When Steve retired from Goodyear, he took over the beekeeping. Today, their business is known as Country Creek Honey.

Steve says with a smile, "This has grown into a hobby well out of control." The Tiptons own 100 hives. At 60,000 to 80,000 bees per hive, that means that the Tiptons could have some 8 million bees. As amazing as that sounds, Steve says it pales in comparison to some commercial operations in California.

"There are some California operators with a thousand hives, where they use the bees to pollinate fruit and almond orchards," he says.

Steve and Becky are self-taught beekeepers, and now they share their expertise with others. They teach in the master beekeeper program at the University of Nebraska (directed by Dr. Marion Ellis), do seminars for the Kansas Honey Producers, and teach beginning beekeeping classes locally. Becky has represented Kansas on committees of the National Honey Board.

Steve says, "One of the things we learned was to promote anything that comes out of the hive." In other words, the honey has value, but other related products such as beeswax can have value as well.

continued on page 9
The Tiptons took this advice to heart. They market an amazing variety of products and flavors. For example, they offer lip balm, soap leaves, beeswax lotion, liquid soap, natural insect repellent, and - oh yeah - honey.

All these products are made by the Tiptons themselves from honey or beeswax from their hives, with added flavors like raspberry cream, cinnamon, blackberry, wildflower, and jalapeno. The soaps come in flavors like honey lemon sunshine scrub, bee clean shampoo and body bar, drone scrub, bees in the garden, buzzy face, honey herb, cranberry bumble, pollen pleasure, honey rose, and many more. There is even a baby bee extremely mild soap.

In addition to the soap and lotion bars, there are soap leaves, flavored honey stix, and a natural insect repellent called Buzz Off. All these products are sold at farmers’ markets, festivals, and craft fairs. One passerby at the Topeka farmers market described Steve as "the best bee person alive."

Becky teaches soapmaking and Steve gives talks to schools and garden clubs. They have gone to honey group meetings in locations from Texas to Delaware, but after those meetings, they return to their rural community of Meriden, Kansas, population 701 people. Now, that’s rural. How exciting to find these entrepreneurs of bees in rural Kansas.

Busy as a bee. Just as bees stay busy in the field and in the hive, so Steve and Becky stay busy at promoting honey and related products. We commend the Tiptons for making a difference with their honey production and marketing. This type of agricultural entrepreneurship can help rural communities bee all that they can bee.

The mission of the Huck Boyd National Institute for Rural Development is to enhance rural development by helping rural people help themselves. The Kansas Profile radio series and columns are produced with assistance from the K-State Research and Extension Department of Communications News Unit. Audio and text files of Kansas Profiles are available at http://www.kansasprofile.com. For more information about the Huck Boyd Institute, interested persons can visit http://www.ksre.ksu.edu/huckboyd or call 785-532-7690.

K-State Research and Extension is a short name for the Kansas State University Agricultural Experiment Station and Cooperative Extension Service, a program designed to generate and distribute useful knowledge for the well-being of Kansans. Supported by county, state, federal and private funds, the program has county Extension offices, experiment fields, area Extension offices and regional research centers statewide. Its headquarters is on the K-State campus, Manhattan.

K-State Research & Extension News
The Kansas Honey Producers Association will hold their spring meeting in Hays, Kansas on Friday, March 5th and Saturday March 6th. Guest speakers will be Dr. Marion Ellis of Lincoln, Nebraska and John Talbert of Josephine, Texas. This meeting will include a great deal of beginning beekeeping concepts—just good old basic information and a concurrent program for more experienced beekeepers. Note from Joli: “As you can tell from the program, I’m still working on the concurrent program.”

The meeting will be held at the Ramada Inn, Hays Convention Center at 3603 Vine Street, Hays, Kansas (I-70 at Exit 159); phone: 785-625-7371. Room reservations must be made by February 18th - rates are $65.00 per night. Mention the Kansas Honey Producers to get this rate.

Dr. Marion Ellis
Dr. Marion Ellis is a Professor and Extension Apiculturist at the University of Nebraska in Lincoln. Dr. Ellis is a leader in the research to find the cause and treatment for Colony Collapse Disorder. He initiated the Midwest Master Beekeeping Course and has promoted best practice beekeeping throughout the region. He is an incredible speaker with solid commonsense ways to keep bees.

John J. Talbert
John is the owner of Sabine Creek Honey Farm in Josephine, Texas. He grew up on a dairy farm in McLennan County near Waco. John attended UT Austin and graduated with a BS in Mechanical Engineering. He’s been a beekeeper since 1985 and past President of the Collin County Hobby Beekeepers Association, past President of Texas Beekeepers Association (TBA), and current Chairman of the TBA State Fair Booth Committee. He is Blake Shook’s mentor.

Dori Porter
Dori is a M.S. student working under the supervision of Dr. Marion Ellis and graduated from UNL in May 2008, majoring in Insect Science and minoring in Biological Sciences. Dori was a past president of the Insect Science Club.

We’ll have two SPECIAL activities:

1. Friday night for the buffet we’ll have ice cream for dessert. Members are asked to bring homemade ice cream toppings to add to the buffet to share with others—hopefully you’ll make them with honey. Please bring recipes to share.
2. Our contest for this meeting will be a gift package/basket contest. Friday afternoon they will be judged, using the same criteria as the state fair. All baskets will then be put on Saturday’s silent auction to benefit the Honey Queen and Youth Scholarship programs.

Judging criteria - Gift Package: Items must be clearly labeled, as they would be offered for sale - except any marks identifying the entrant must be obscured or removed, or fictitious. Gift basket, if wrapped, must be able to be unwrapped for judging.

- Originality & creativity: 30 points
- Quality of products: 20 points
- Variety i.e. Other products from the hive: 30 points
- Commercial appeal: 20 points
March 5th, Friday

Cody: 7:30-8:00  Registration, silent auction set up

Cody: 8:00-8:15  Announcements, Introductions, President Jim Kellie

Cody: 8:15-9:00  Keynote address: Dr. Marion Ellis—Beekeeping Today—What is really going on with our bees and our beekeeping Industry.

Cody: 9:05-9:45  History of Beekeeping, Ron Ward

Custer: 9:05-9:45  Promoting Your Honey Business—Putting together a recipe or product brochure, introducing a recipe each week and more, Becky Tipton

Cody: 9:50-10:05  Break, Bid on Silent auction items

Cody: 10:05-10:45  Basic Equipment, the essentials of what you need and the choices you’ll have to make and the proper name for the equipment, Larry Coppinger

Custer: 10:05-10:45  TBA

Cody: 10:50-11:25  Starting a Beekeeping Club in your area or improving the one you already have, John Talbert (The Northeast KS Beekeepers Assn. has made several changes to their club based on some things we learned from John)

Cody: 11:30-12:00  Bi-Annual Business Meeting

Atrium 12:00-1:00  Lunch, Prepared lunch at the hotel, see registration form for price and to place order.

Cody: 1:00-1:45  Putting beekeeping equipment together, Cecil Sweeney

Custer: 1:00-1:45  TBA

Cody: 1:50-2:35  Small Hive Beetle and African Bees—how we deal with them in Texas, John Talbert

Cody: 2:35-2:50  Break—end of silent auction at the end of the break

Cody: 2:50-3:35  Locating the Perfect Yard, Ron Hopkins

Custer: 2:50-3:35  Making your hobby into a business, John Talbert

Cody: 3:40-4:25  Honey Bee Biology, Dr. Marion Ellis

Cody 4:30-5:00  Gift Basket Judging—members are asked to bring gift baskets to be judged and then sold on Saturday’s Silent auction with proceeds going the Honey Queen and the youth scholarship programs

Atrium 6:00 p.m. Dinner Buffet & Program—Bees in the mail, Marion Ellis

Program subject to change—guest speakers, topics or times may change
March 6th, Saturday
Beginning Beekeeping Class will be held in

Cody: 8:15-8:30  Introductions, silent auction set up

Cody: 8:30-9:15  Ways to acquire bees & installing a package of bees, Becky Tipton

Custer: 8:30-9:15  Queen rearing for the Commercial Beekeeper, Jim Kellie

Cody: 9:20-10:05  Spring Management –queening and making nucs to control swarming and increase your hives, John Talbert

Custer: 9:20-10:05  Making Natural & Flavored Creamed Honey and Infused Honey, Cecil Sweeney

Cody  10:05-10:25  Break, Bid on Silent auction items

Cody  10:25-11:10  Honey Bee Diseases and Pests, Dr. Marion Ellis

Cody  11:15-11:25  Presentation by one of our 2009 Youth Scholarship winners, Lacie Falk

Cody  11:25-11:40  Bee Prepared—bee stings and first aid, Ron Ward

Cody  11:40-12:00  Beekeeping Etiquette, Becky Tipton

Custer  11:15-12:00  HIDI: Raising a few queens for the hobby beekeeper, Robert Burns

Atrium  12:00-1:00  Lunch, Prepared lunch at the hotel, see registration form for price and to order. At the end of lunch the silent auction will end.

Cody  1:00-1:45  Fall & Winter Management, getting your bees through the winter, Dr. Marion Ellis

Custer  1:00-1:45  Labeling and Packaging your products, Beth Ward

Cody  1:50-2:35  Integrated Pest Management, Marion Ellis

Custer  1:50-2:35  TBA

Cody  2:35-2:50  Break

Cody  2:50-3:35  Native Bees and their Conservation, Dori Porter

Custer  2:50-3:35  Giving a Presentation to the Public, Greg Swob

Cody  3:40-4:25  Extracting 101—just the basics for beginners—Removing Honey from the hives, how to uncap your honey, extract it and strain it, Ron Ward

Custer  3:40-4:25  Making Mead, Steve Tipton

Program subject to change—guest speakers, topics or times may change
