

SOUTHEASTERN AGRICULTURAL LABORATORIES, INC.

PRODUCTS AND SERVICES

Soil Analysis

Tests are typically complete within 48 hours of intake, excluding weekends.
Heavy traffic during peak season may delay results.

Basic Soil Analysis.....\$8.00

Phosphorus, Potassium, Magnesium, Calcium, Zinc, Copper, Manganese, Boron, Iron, Soil PH, Buffer PH, CEC, & % Base Saturation. Reports provided with recommendations based on crop yields.

Advanced Soil Analysis.....\$10.00

Phosphorus, Potassium, Magnesium, Calcium, Zinc, Copper, Manganese, Boron, Iron, Soil PH, Buffer PH, CEC, % Base Saturation, PLUS Sulfur. Reports provided with recommendations based on crop yields.

Complete Soil Analysis..... \$12.00

Phosphorus, Potassium, Magnesium, Calcium, Zinc, Copper, Manganese, Boron, Iron, Soil PH, Buffer PH, CEC, % Base Saturation, PLUS Sulfur & Organic Matter. Reports provided with recommendations based on crop yields.

Nematode Assay.....\$16.00

Includes counts for all major parasitic nematodes and thresholds by crop.

Pegging Zone Analysis \$6.00

Calcium and potassium levels with ratios and recommendations for gypsum applications on peanuts.

Sampling Supplies

Model LS Soil Probe w/Step (36").....\$120.00
Sample Bags & Info Sheets.....Free

We also offer complimentary shipping labels for bulk shipping AND no-charge local sample pick-up.

*Call us when you're running low...
We'll mail you some more!*

SEAL performs testing services and field support to growers, consultants, and agricultural retailers throughout the Southeast and across the United States.

The lab is equipped with top notch equipment, utilizing 4 Varian ICPs for nutrient testing and 2 Elementar analyzers for carbon, nitrogen, and protein determination.

We provide the necessary supplies and offer services such as *local sample pick-up* and *complimentary shipping* to make the process as quick and smooth as possible.

Listed here are many of the services that we offer, but not all. If you are interested in a service that is not listed, please just give us a call.

Plant Analysis

Tests are typically complete within 48 hours of intake, excluding weekends.
Heavy traffic during peak season may delay results.

Plant Tissue Analysis \$16.00

Nitrogen, Phosphorus, Potassium, Magnesium, Calcium, Sulfur, Boron, Zinc, Manganese, Iron, Copper. Reports provided with recommendations based on crop stage.

Petiole Analysis\$8.00

Nitrate Nitrogen, Phosphorus, Potassium. Reports provided with recommendations based on crop stage.

Crude Protein Analysis..... \$8.00

Other Services

AgFleet GPS Sales and Service.....Call

For those interested in variable rate spreading, GPS soil sampling, etc. Call for details.

Advanced GPS Sampling \$2 to \$10/acre

Precision Ag sampling on 1 to 20 acre grids with variable rate data, maps, field boundary, acres, soil test results, etc. Call for details.

The following tests can also be completed upon request. Call for details.

- Pesticide/Herbicide Analysis
- Feed Analysis
- Manure/Sludge Analysis
- Water Analysis
- Fertilizer/Lime Analysis

Need results ASAP?

We offer a 24-Hour Guarantee!

\$25.00 per sample

Results guaranteed 24 hrs from time of intake, excluding weekends
