2. Update of the Reserve Study. Each year following the establishment of the baseline reserve study as provided above, the Association shall cause the reserve study, including both the physical and financial analysis, to be evaluated by Board of Directors or its agent to determine increases in replacement costs and decreases in remaining useful lives of the components of the reserve study to adequately address changes to be made to the reserve study. The update may be done either with or without a site visit. In determining whether a site visit is required in any given year in order to update the reserve study, the Association shall take into consideration the following:
  - A. Any special or extraordinary issues facing the community (such as an increase in roof leaks or other maintenance issues).
  - B. Increased deterioration in any components beyond normal wear and tear.
