### SPEAKERS:

**Jay Evans (USDA).** Jay Evans currently works at the Agricultural Research Service (ARS), United States Department of Agriculture. Jay does research in Bioinformatics, Entomology and Genetics. Current lab projects involve interactions among bees, microbes, and mite-transmitted viruses, and efforts to reduce bee losses from chemical and biotic stresses.

**Krispn Given, Purdue University, West Lafayette, Indiana.** Krispn Given is recognized as one of the leading authorities in honey bee instrumental insemination and honey bee breeding. He is the Apiculture Specialist at Purdue University's Department of Entomology in West Lafayette Indiana. Mr. Given started breeding bees 18 years ago, conducting research with 150 colonies looking for solutions to improve honey bee health. He currently oversees Purdue University's long-standing honey bee breeding program, teaching annual queen rearing short courses in addition to managing the honey bee laboratory and extension activities.

**Dr. Judy Wu-Smart** is the Extension and Research Entomologist at the University of Nebraska-Lincoln, Department of Entomology. The UNI, Bee Lab pursues research questions and extension programs focused on stressors impacting pollinator health in both managed and wild bee communities. We certainly appreciate Dr. Wu-Smart presentations at past Fundays, and we are most fortunate that she has accepted our invitation to share with us again.

**Sami Aaron** is an Extension Master Naturalist and Climate Reality Leader and was instrumental in the development of the management project at the Pollinator Prairie, a restored Superfund site in Olathe, KS.
