# API Q2 Combined Essentials & Auditing Course

## Program Overview

This 5-day course provides participants with an in-depth understanding, knowledge, and skills needed to carry out successful internal and external API Q2 audits. The latest methodologies, practices, and techniques are utilized including practical application for the upstream service sector and their global supply chain that supports the petroleum and natural gas industry.

This course utilizes the latest training methodologies and uses a combination of lecture, examination, and group auditing to ensure each participant is able to analyze properly, audit, document, and report findings, concerns, and observations. This course covers all of the technical requirements outline in the specification. This course is the first in the industry that includes conducting a full API Q2 audit against a fully documented QMS and records management system, to include all well site planning and execution records. Throughout the audit, participants undergo observations and receive competency assessments by Accredited Providers and Subject Matter Experts. Participants that complete this course will receive a unique tracking and certification number and the designation of Q2 Lead Auditor along with an unique registration number issued by WPAG.

## Summary of Course Curriculum

- Auditing the upstream service sector and the global supply
- How to audit the controls outlined in the API Q2 Specification, 1<sup>st</sup> Edition
- Audit preparation, performance, reporting, and follow-up
- Conducting a full audit on Section 4.0, 5.0 and 6.0 of the Specification
- Auditing an SQP from inception through execution and how it ties in all of the API Q2 elements
- Auditor competencies, responsibilities, and accountabilities

## Who Should Attend

Operators, manufactures, industry suppliers, 3rd party auditors, and consultants who support the upstream service sector and their supporting global supply chain. This program is designed for quality, HSE, and operational personnel.

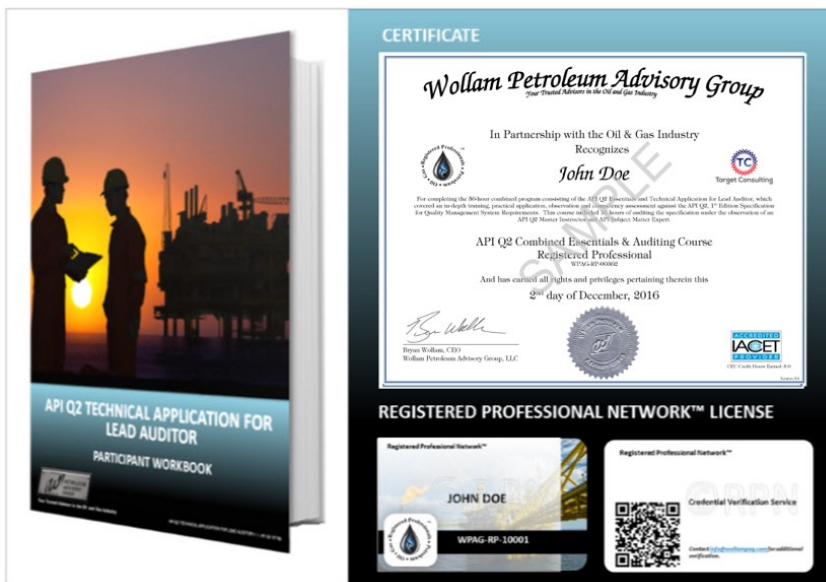

This course is utilized by the international, national and state owned oil companies for both training and to obtain a baseline competency assessment by an accredited provider.
