

# X Large Dual Chamber Model

- 12 gauge steel sheet exterior skin and interior cook chamber shell
- 2"x2" steel square tube frame
- 1"x1" steel handle
- 2" thick, 8 pound Roxul insulation in all doors and lining inside exterior walls
- 4" thick, 8 pound Roxul insulation around both charcoal chute/fireboxes as well as cook chamber wall and exterior walls.
- 5 racks are standard and included in each cook chamber (7 sets of rack runners) made of 1"x1" square steel tube and 3/4" #9 flattened expanded steel. Racks measure 27 1/2" x 29 1/2" to allow fitting of 2 full size steam pan and allow proper air flow (6" spacing between racks)
- 8" wide x 8" tall x 12" deep ash boxes (1/4" thick steel) Comes with an ash pan for each chamber
- Firebox/Charcoal Chutes are 8" x 8" steel. Bottom 12" (where actual fire burns) is fabricated from 1/2" thick steel. Remainder of charcoal chute is 1/4" steel. Fire burns on 1/2" thick grate with engineered openings to allow ash to drop into ash pan and allow cooker to properly feed charcoal
- Patented heat distribution systems made of 4" x 8" steel tube, 1/4" thick (Engineered to distribute heat evenly throughout cook chamber)
- Floors are sloped from 2" on back wall of cook chamber to 1" on front chamber sides to 0" in the center front of cook chamber where grease drain hole is located.
- Steam pan holders on bottom of cooker.
- Comes standard with 4" exhaust
- 1 1/2" steel pipe nipple on each ash box door for air draft control device
- Comes standard with mounting bracket for trailer floor (Wheel options are available)
- Standard with 2 toggle clamp latches on each cook chamber door, 1 on each charcoal chute door and ash box door
- Comes standard with 3" dial, 6" stem thermometer in each cook chamber door
- Over 100k choices of paint colors. Because these are so well insulated we are able to use true automotive paints and all the color choices available. These are cool to the touch and can accept vinyl graphics
- We use NO screws or rivets on our cooker. Every seam welded solid.
- We use NO body filler on our cookers
- Exterior is 70" Wide, 56" deep from handle on door to pipe on ash box door and 60" tall from ground to top of exhaust.

We want to make this cooker yours and not just another cookie cutter production model. We have many options and customizations available for you to choose from.
