

Alternating Pressure Therapy for Geriatric Recliners

- Proven alternating pressure therapy for patients in geriatric recliners
- Easily attaches to most standard recliners
- Quiet, compact pump hangs securely from the chair handle in padded case
- Comfortable low shear, low friction, vapor permeable cover

“Proven alternating pressure therapy for patients in geriatric recliners.”

The Telemade, Patriot GACO provides alternating pressure relief therapy to provide an advanced surface to assist in the prevention of pressure ulcers for patients in geriatric recliners. The GACO easily attaches to most standard recliners. The easy to use quiet controller hangs out of the way in a soft carrying case.
