Superkids Classic
Presented by Sunshine State Superkids

And

We invite you to be part of an innovated programs for all children of Central Florida

Sunshine State Superkids was developed out of a passion for soap box derby racing and children. They looked at what they can do for the children in Central Florida. They saw children that were not able to do much because of a disability, looked at what the parents of these children had in Medical Bills, then looked at the children that are in lower income areas and children that are in foster group homes that were disrupted from their homes for whatever reason. They are working to give the children a day that they will not forget.

They first put together an adaptive sport for the children with disabilities and under privileged children of soap box derby, with having cars that handle 2 children. One side will be a child that can be the driver and the other side is for the child not able to handle the car. All cars are designed for all children, especially the child with disabilities. There are race harnesses to help a child to sit up. There are headrests and pillows if a child needs them. The cars are designed to open in half so a child in wheel chair can be lifted in and out easier.

This day is totally FUN and FREE! Let's go racing. There will be breakfast, lunch and drinks available for the day.

Now for the summer of 2021 Sunshine State Superkids will start a STEM program for the under-privileged children. The STEM Program will give children a chance to work as a team (2-5) to accomplish a goal of building a soap box derby car. This program will be held on 6 Saturday for 2 hours each day. The children will learn the way to use science, technology, engineering and math skills to make the car race ready for a day of racing. Once the cars are all completed, they will get a day of racing, each child in the team will be able to drive the car they built.
