

PRIMARY 11

24 months to 36 months

This is quite a time in your child's life - your adorable little one is becoming their own person. Two-year-olds are talking, playing and interacting with parents and others more each day! They can explore new activities and want to do things for themselves. At Primary Prep Academy, we take these wonderful developmental milestones and run with them! We have chosen Creative Curriculum for our two-year-old program because of its emphasis on continued verbal development and early math concepts. The curriculum focuses on socialization skills, small and large muscle control, music, art and dramatic play, among other fun and challenging activities, all in a supportive, loving environment.

Older toddlers will begin to determine what it is they really enjoy through the exploration of their inviting classroom learning centers. On any given day, children will rotate among art, reading, building, discovery science, dramatic play, math and manipulative centers. They will also get plenty of physical activity participating in our music and movement program and having lots of fun with friends on both their outdoor and indoor playground.

The second year is truly a time of exploration, discovery and creative play in a child's life. We are so happy to share in such an awesome adventure!
